

(b)(3), (b)(6) beginning with (b)(3), (b)(6) and then (b)(3), (b)(6) and (b)(3), (b)(6) later in the op. Some of the coordination with those assets was done on a separate frequency handled by the co-pilot. The remainder of our time overhead ~~was taken up by~~ we were tasked with maintaining a defensive scan of ~~friendly position~~ the recovery & evacuation effort, acting as a communication relay between (b)(3), (b)(6) and the CASEVAC (b)(3), (b)(6) QRF packages, and checking other players in and out of the stack. (b)(3), (b)(6) requested that we be prepared to pass a medevac 9-line. ~~to the~~ At this point we were in touch with (b)(3), (b)(6) flight, which was the element tasked with exfil. (b)(3), (b)(6) passed that the 9-line had been passed, but soon after had us pass to (b)(3), (b)(6) flight the following 9-line in case the assigned MEDEVAC element (b)(3), (b)(6) was unable to arrive quickly enough:

(b)(1)1.4a, (b)(1)1.4g

URGENT/NONE/
A-BAG/LITTER/POP-UP, POSSIBLE ENEMY/IR STROBE/ST 1306/HLZ & WINDS
AS BRIEFED. At some point not long after this, (b)(3), (b)(6) confirmed that (b)(3), (b)(6) flight would be the CASEVAC, but that he wanted (b)(3), (b)(6) flight to come in simultaneously to get everyone else out. However, while enroute, (b)(3), (b)(6) flight was instructed by their C2 to return to base until things cooled down. (b)(3), (b)(6) flight ended up landing at the site passed ~~in~~ ⁱⁿ the MEDEVAC 9-line (see above) which was at the base ~~of~~ ^{of} the ridge where the strike occurred. The ensuing CASEVAC took some time (not sure how long, I would have to review the tapes) due to the rough terrain the casualties had to be moved over to get to the ~~pic~~ HLZ. The initial plan was to ~~see~~ have (b)(3), (b)(6) return with the QRF after dropping-off their patients. However, ~~the~~ because of how long (b)(3), (b)(6) was on the ground, the plan shifted to (b)(3), (b)(6) bringing in the QRF, which they eventually did to the CASEVAC HLZ (b)(3), (b)(6)

(b)(3), (b)(6)

Was the QRF was on the ground, (b)(3), (b)(6) instructed
Once

us that (b)(3), (b)(6) (the (b)(3), (b)(6) on-board the QRF) would
have control. After (b)(3), (b)(6) moved to the top of the
hill where the strike occurred, he asked for the location
from where friendlies originally took fire. (b)(3), (b)(6) passed
to him that the cat. 1 grids generated for (b)(3), (b)(6) strike
were:

(b)(1)1.4a, (b)(1)1.4g

This grid differs by
8 meters from the panel readback read by (b)(3), (b)(6) but regardless,
the bombs struck within about 10 meters of their intended
target (according to our (b)(3), (b)(6)

(b)(1)1.4g). In addition to the grid for (b)(3), (b)(6) strike, (b)(3), (b)(6)
passed to (b)(3), (b)(6) the last known friendly positions at the
time of the strike: (b)(1)1.4a, (b)(1)1.4g and

(b)(1)1.4a, (b)(1)1.4g. (b)(3), (b)(6) also passed that from (b)(3), (b)(6) HLZ
(b)(1)1.4a, (b)(1)1.4g the fire was coming from a (b)(1)1.4a, (b)(1)1.4g.

Some time later, (b)(3), (b)(6) reported seeing overt lights
and a possible mob on an adjacent ridge. He passed
a rough grid ((b)(1)1.4a, (b)(1)1.4g) which plotted about (b)(1)1.4a, (b)(1)1.4g
Northwest of him. We pushed both our (b)(1)1.4a, (b)(1)1.4g there
and eventually found a (b)(1)1.4a, (b)(1)1.4g with aprox.

(b)(1)1.4a, (b)(1)1.4g MAMs (Military...), (b)(3), (b)(6) confirmed those were good coords
(b)(1)1.4a, (b)(1)1.4g) and eventually ~~set~~ used his (b)(1)1.4a, (b)(1)1.4g
on the point he saw the overt light coming from.

(b)(3), (b)(6) confirmed the (b)(1)1.4a, (b)(1)1.4g landed on what
appeared to be an ANA checkpoint, and we confirmed this.

During this time, I was also relaying from (b)(3), (b)(6) to
(b)(3), (b)(6) flight to coordinate for exfil. ~~The~~ The plan was
for (b)(1)1.4a, (b)(1)1.4g to land at HLZ (b)(1)1.4a, (b)(1)1.4g) and

(b)(1)1.4a, (b)(1)1.4g to land at the CASEVAC site. During this time (b)(3), (b)(6)
(b)(1)1.4a, (b)(1)1.4g a possible attack, which (b)(3), (b)(6)
confirmed with his own (b)(1)1.4c our own DSO also (b)(1), 1.4c (b)(3), (b)(6)

(b)(1), 1.4c

(b)(3), (b)(6)

~~It was at this point the~~ Soon after ~~ordered the exfil, and the helos were 15 minutes out, w~~ (b)(3), (b)(6)

During this time we were also coordinating a tanker time. We passed to both JTACs the options: 1) leave in (b)(1)1.4a, (b)(1)1.4g minutes for air refueling (AR) and be back by (b)(1)1.4a, (b)(1)1.4g or 2) stay on station and bingo out about (b)(1)1.4a, (b)(1)1.4g After it was confirmed that exfil would occur prior to this, both JTACs were in agreement that we stay on until bingo. Soon after, (b)(3), (b)(6) checked on station and (b)(3), (b)(6) requested that we get the gas ~~and~~ while (b)(3), (b)(6) remained overhead in our stead, ~~At the~~ with the understanding being that we would then have the gas stay on station another several hours in case anything went wrong with exfil. At the time we checked off, the Exfil package was airborne & (b)(1)1.4a, (b)(1)1.4g minutes out. ~~It was the crew's opinion that we were best suited~~ At While on the boom, we heard the exfil ~~be~~ called complete, and (b)(3), (b)(6) cleared us RTB. They return flight was without note, ~~except for the engine fire on parking.~~ (b)(3), (b)(6)

IV. STATEMENT

IN TACTICAL GEAR APPROACHED THE IMPACT SITE (TOTAL NEAR 10) AND LOOKED LIKE SOME WERE ADMINISTERING FIRST AID & CPR. (b)(3), (b)(6) THEN GAVE US (b)(3), (b)(6) THE AIR STACK WHILE THEY TRIED TO SORT THE MESS OUT. HE REQUESTED THAT WE KEEP A (b)(1)1.4a, (b)(1)1.4g POSTURE AROUND FRIENDLIES AND TO KEEP THE GUYS ON THE RIDGE SAFE. ABOUT THIS TIME (b)(3), (b)(6) ENTERED THE ROZ AND STARTED SCHEDULED ASSIGNED (b)(1)1.4a, (b)(1)1.4g NOT LONG AFTER, I HEARD THE FIRST CASUALTY REPORT OVER TEAM FREQUENCY, THEN (b)(3), (b)(6) MENTIONED HE WAS COORDINATING FOR A MEDEVAC. HE INITIALLY WANTED TO USE (b)(3), (b)(6) FLIGHT, THE CH-47'S FRAGGED FOR THE EXFIL, TO EXFIL CASUALTIES AND ALL FRIENDLIES, BUT (b)(3), (b)(6) WAS TOLD TO STAND DOWN, AND (b)(3), (b)(6) FLIGHT WAS LAUNCHED. (b)(3), (b)(6) AN AWT, CHECKED ON AND (b)(3), (b)(6) WAS ABLE TO TALK HIM ON TO FRIENDLY POSITIONS AND GIVE HIM AN AREA AND SITUATION UPDATE. THINKING THAT THIS COULD BE A LENGTHY OP, WE STARTED COORDINATING WITH OUR (b)(3), (b)(6) FOR AIR OR GAS AT KANDAHAR (APPROX (b)(1)1.4a, (b)(1)1.4g WVA7). (b)(3), (b)(6) FLIGHT CALLED WHEELS UP (b)(1)1.4a, (b)(1)1.4g OUT. I WAS ABLE TO PICK THEM OUT AND TALK (b)(1)1.4a, (b)(1)1.4g ON AT THE (b)(1)1.4a, (b)(1)1.4g CALL. ABOUT THAT TIME, CALLS FOR MORE STRETCHERS AND SPACE BLANKETS WERE HEARD ON TEAM AND (b)(3), (b)(6) ASKED US TO RELAY ON (b)(1)1.4a, (b)(1)1.4g WE GOT IN TOUCH WITH (b)(3), (b)(6) AS WELL ((b)(3), (b)(6) ASSISTED) TO VERIFY THEY HAD THE EQUIPMENT (THIS WAS THE FIRST INDICATION OF MULTIPLE CASUALTIES, SINCE ONLY 1 WAS RELAYED IN THE CASEVAC 9-LINE). THE FIRST (b)(3), (b)(6) LANDED AND THE STRETCHERS STARTED HEADING UP THE RIDGELINE. THE SECOND (b)(3), (b)(6) LANDED FOR ABOUT 15-20 MINUTES THEN LANDED FOR ADDITIONAL CASUALTIES. CONTINUAL REQUESTS FOR 3 MORE STRETCHERS LED (b)(3), (b)(6) TO REQUEST VERIFICATION OF TOTAL NUMBER OF CASUALTIES. (b)(3), (b)(6) RELAYED THE REQUEST TO (b)(3), (b)(6). AFTER A SHORT DELAY, HE RESPONDED WITH 0X US CASUALTIES AND 1X ANA MISSING. (b)(3), (b)(6) ELECTED TO STAY UNTIL ALL CASUALTIES WERE ON BOARD BEFORE DEPARTING. (b)(3), (b)(6) THEN REQUESTED THE QRF TO BE LAUNCHED TO HELP SECURE THE RIDGELINE AND HELP WITH A PROBABLE BLUE-ON-BLUE. (b)(3), (b)(6) RELAYED TO (b)(3), (b)(6) FLIGHT (b)(3), (b)(6) REQUEST, AND (b)(3), (b)(6) COORDINATED THE ACTIVATION OF THE QRF. ABOUT THIS TIME, (b)(3), (b)(6) CHECKED ON AND (b)(3), (b)(6) PROVIDED A TALKON ~~FOR~~ TO FRIENDLY POSITIONS ALONG WITH A SITUATION AND AREA UPDATE. (b)(3), (b)(6) CALLED WHEELS UP WITH THE QRF (b)(3), (b)(6)

IV. STATEMENT

AS THE REMAINING CASUALTIES WERE STARTING TO BE MOVED DOWN THE RIDGELINE TO (b)(3), (b)(6) (b)(3), (b)(6) ALSO RELATED (b)(3), (b)(6), A QUALIFIED JTAC WAS INBOUND WITH THE ORF. AS (b)(3), (b)(6) PROVIDED DEFENSIVE SCANS OF FRIENDLY POSITIONS, (b)(3), (b)(6) RELATED THE HLZ DETAILS TO (b)(3), (b)(6). ONCE ON THE GROUND, THE ORF PROCEEDED UP THE RIDGELINE TO PROVIDE A DEFENSIVE PERIMETER AND (b)(3), (b)(6) CAME UP ON COMMS. HE FIRST VERIFIED THE FRIENDLY LOCATIONS AND TARGET GRIDS THAT (b)(3), (b)(6) RELATED TO (b)(3), (b)(6). THE FRIENDLY GRIDS PASSED WERE NOT IN PROXIMITY TO THE TARGET GRID PASSED TO (b)(3), (b)(6) AND LATER TO (b)(3), (b)(6). HE DIRECTED (b)(3), (b)(6) TO LOOK AT A GRID FOR POSSIBLE ENEMY ACTIVITY, AND THE GRIDS PLOTTED OUT TO WHAT LOOKED LIKE AN ANA OUTPOST ABOUT 2KM TO THE NORTHWEST OF FRIENDLIES ON THE RIDGELINE. (b)(3), (b)(6) THEN WORKED WITH (b)(3), (b)(6) TO START COORDINATING AN EXFIL. (b)(3), (b)(6) FLIGHT REPORTED THEY WOULD BE (b)(1)1.4a, (b)(1)1.4g WHEN DONE REFUELING. (b)(3), (b)(6) HAD (b)(3), (b)(6) INVESTIGATE A FEW OTHER LOCATIONS AS A RESULT OF (b)(1)1.4a, (b)(1)1.4g

(b)(1)1.4a, (b)(1)1.4g ABOUT THIS TIME (b)(3), (b)(6) AN MW-1 CHECKED IN AND (b)(3), (b)(6) PROVIDED TALK-ON AND SITUATION AND AREA UPDATE (b)(3), (b)(6) CALLED FOR IMMEDIATE EXTRACT SOON AFTER (b)(3), (b)(6) FLIGHT DEPARTED WITH 6 US CASUALTIES, THE 1X ANA STILL MISSING. (b)(3), (b)(6) MENTIONED (b)(1)1.4a, (b)(1)1.4g ADDITIONAL CH-47'S WOULD JOIN THE FLIGHT, THEY WERE GOING TO (b)(1)1.4a, (b)(1)1.4g AND WOULD GET WHEELS UP ASAP. (b)(3), (b)(6) 73 CALLED UP ON FIRES REQUESTING PERMISSION TO ENTER THE ROZ AND A BATTLEFIELD HANDOVER FROM (b)(3), (b)(6), SO WE COULD DEPART STATION TO GET GAS. BHO COMPLETE, (b)(3), (b)(6) CHECKED IN WITH (b)(3), (b)(6) AND (b)(3), (b)(6) CALLED FOR US TO BREAK STATION IN ORDER TO GET GAS IN CASE OF A LENGTHY EXFIL. IMMEDIATELY AFTER, THE ORF CALLED (b)(1)1.4a, (b)(1)1.4g TO GET OUT, (b)(3), (b)(6) ALONG WITH ALL FRIENDLIES MOVING TO PZ POSTURE. (b)(3), (b)(6) TURNED THE AIR STACK OVER TO (b)(3), (b)(6) AND DEPARTED THE ROZ TO AIR. JUST BEFORE DEPARTING, I HEARD THAT 2 US WERE KIA OVER TEAM FREQUENCY. WHILE ENROUTE TO THE TANKER, WE LISTENED TO THE COMMS INDICATING THE EXFIL WAS TAKING PLACE. WHILE ON THE (b)(3), (b)(6), WE HEARD EXFIL COMPLETE AND PZ CLEAN, ON FIRES FREQ. IMMEDIATELY AFTER, (b)(3), (b)(6) CLEARED US TO RTB. (b)(3), (b)(6) LANDED AT BAGRAM APPROXIMATELY (b)(1)1.4a, (b)(1)1.4g MINUTES LATER.

1630z, (b)(3), (b)(6) flight check on to confirm exfil time, (b)(3), (b)(6) attempted to use (b)(3), (b)(6) as a medevac but was denied by (b)(3), (b)(6) uppers. The medevac, (b)(3), (b)(6) was already en-route. (b)(3), (b)(6) arrived quicker than the casualties could be moved down the mountain. By the time (b)(3), (b)(6) finally had all casualties the GFC had called for the QRF. (b)(3), (b)(6) brought the QRF in order to provide security for the exfil. In this time, two RPAs had checked on into the stack, (b)(3), (b)(6) and (b)(3), (b)(6). I noticed an aircraft (b)(1)1.4a, (b)(1)1.4g below us moving between 5-15 miles from the RoZ CP. I attempted to find out his type + comm capabilities through (b)(3), (b)(6) but all (b)(3), (b)(6) would tell me was that he was a (b)(3), (b)(6) (RPA). Once (b)(3), (b)(6) checked on into the RoZ, I cleared them in (b)(1)1.4a, (b)(1)1.4g. I gave them the stack run down, passed friendly locations, a suspicious out post at (b)(1)1.4a, (b)(1)1.4g and about that RPA at (b)(3), (b)(6). The handoff was done over CJSOAC SAT + the FIRES LNO was able to pass (b)(3), (b)(6) is a (b)(3), (b)(6). We departed the RoZ until exfil while our C2 + NAU maintained SA of the situation on Primary Fires (b)(3), (b)(6).

IV. STATEMENT

1455T10

The crew was in transient to the operation and the (b)(3), (b)(6) heard (b)(3), (b)(6) had been declared over radios. Pilot directed the crew to then come up on oxygen and for the number one gun to be put online. I was scanning so the primary gun brought the gun online. We were holding (b)(1), 1.4a, (b)(1) 1.4b outside of the ROZ trying to get clearance and comms were frantic. We were not getting needed info from (b)(3), (b)(6) and couldn't get a hold of the JTAC. There was a break through in comms and we got a hold of the JTAC while he was trying to get (b)(3), (b)(6) go hot. We heard the full 9 line, just the remarks & the JTAC & (b)(3), (b)(6). JTAC then asked us to relay coordinates and 2 by 4 (b)(3), (b)(6) 1.4a, (b)(1) 1.4b seconds delay. Once (b)(3), (b)(6) was cleared hot and Pilot had visual we were cleared into the ROZ and entered towards the bot. The JTAC wanted us to cover any possible (b)(3), (b)(6). Pilot asked about seconds call by (b)(3), (b)(6) I said they called (b)(1), 1.4a, (b)(1) 1.4b about (b)(1), 1.4a, (b)(1) 1.4b seconds ago (b)(1), 1.4a, (b)(1) 1.4b seconds later to have the bombs dropped. Immediately team internal comms went on the Fritz saying friendlies were in the mountain that the bombs had just hit. I kept scanning for further threats to the aircraft & friendlies. The friendlies were marked by IR strobe on the mountain near where the bombs were impacted. There was a lot of static from jamming and hard to make out all of the radio calls going on. The JTAC said there was possible Blue on blue and it needed to be worked. Once blue on blue was verified CASEVAC was called in. Scanning continuously I kept giving updates of air players I could see, and saw the CASEVAC arrive. Confirmed American KIA's last names were read over the radio which there were 2. With the speculation of a total of 6 KIA and 1 AUA missing. We were (b)(1), 1.4a, (b)(1) 1.4b minutes from bingo when (b)(3), (b)(6) came into the ROZ to allow us to aerial refuel. While being refueled (b)(3), (b)(6) covered the exfil, and we disconnected to RTB, (b)(3), (b)(6).

IV. STATEMENT

(b)(3), (b)(6) Takeoff (b)(1)1.4a, (b)(1)1.4g Bagram AFB, AFG

Nothing of note enroute.

Eight minutes from Obj. (b)(1)1.4a, (b)(1)1.4g CJSOAC Fires notified (b)(3), (b)(6) that a TIC was declared.

First communication I remember hearing was (b)(3), (b)(6) ask (b)(3), (b)(6) for reattack, I forget the reason he stated.

(b)(3), (b)(6) directed (b)(3), (b)(6) to hold in our current (b)(1)1.4a, (b)(1)1.4g because (b)(3), (b)(6) was going kinetic and our airspace was HOT.

I think we would up holding on the south side of (b)(1)1.4a, (b)(1)1.4g We heard (b)(3), (b)(6) and (b)(3), (b)(6) communicating about the engagement so we withheld comm's to prevent interrupting them. When there was a pause, we attempted communication w/ (b)(3), (b)(6) and he acknowledged

We requested entry into the ROZ and he cleared us in (b)(1)1.4a, (b)(1)1.4g I remember (b)(3), (b)(6) having trouble communicating with (b)(3), (b)(6), and

emphasizing that he was taking "effective fire" and that he needed the target prosecuted. I also remember him stating that if he could

not get good comm. with (b)(3), (b)(6), he would push (b)(3), (b)(6) off the engage-ment. I think it was at this time (b)(3), (b)(6) was able to commu- nicate with both parties and we offered to relay. (b)(3), (b)(6) inf- ormed us he had (b)(3), (b)(6) targeting (b)(1)1.4a, (b)(1)1.4g, friendlies

located (b)(1)1.4a, (b)(1)1.4g. I think he (b)(3), (b)(6) asked us for an ETA, and I (b)(3), (b)(6)

(b)(3), (b)(6) believe we relayed (b)(1)1.4a, (b)(1)1.4g (b)(3), (b)(6) passed system readback, from his systems (b)(1)1.4a, (b)(1)1.4g, elevation (b)(1)1.4a, (b)(1)1.4g x Grid (b)(1)1.4a, (b)(1)1.4g what I copied. We relayed and (b)(3), (b)(6) requested another Grid (b)(1)1.4a, (b)(1)1.4g for Z total. We relayed (b)(3), (b)(6) "in" call and (b)(3), (b)(6) cleared him to engage. (b)(3), (b)(6) queried us about his clearance and we relayed that he was cleared to engage from (b)(3), (b)(6). (b)(3), (b)(6) also requested that (b)(3), (b)(6) put our (b)(1)1.4a, (b)(1)1.4g on that grid and track any (b)(1)1.4a, (b)(1)1.4g after impact. (b)(3), (b)(6) was holding about (b)(1)1.4a, (b)(1)1.4g away so my (b)(1)1.4a, (b)(1)1.4g fidelity was low. I observed the impacts in the (b)(1)1.4a, (b)(1)1.4g (b)(1)1.4a, (b)(1)1.4g and did not see any personnel moving. After impact, (b)(3), (b)(6) came overhead and I began to scan the hillside for movement. After (b)(1)1.4a, (b)(1)1.4g I found Z personnel moving near a rock on the hillside. I told (b)(3), (b)(6) I saw two PAX moving near the impact site. We had "Team" frequency up and I remember hearing "that was our hill, that was our hill" sometime after impact. (b)(3), (b)(6) asked (b)(3), (b)(6) if they saw any strobes at the (b)(1)1.4a, (b)(1)1.4g location and (b)(3), (b)(6) said no. (b)(3), (b)(6) then asked (b)(3), (b)(6) if their (b)(1)1.4a, (b)(1)1.4g could observe IR strobes and (b)(3), (b)(6) replied affirmative. I repeatedly checked my (b)(1)1.4a, (b)(1)1.4g for strobes on the PAX and I did not see any. I informed (b)(3), (b)(6). (b)(3), (b)(6) inquired about the (b)(3), (b)(6)

IV. STATEMENT

(b)(3), (b)(6) PAX I was observing and I told him they appeared to be wearing tactical equipment. (b)(3), (b)(6) informed us friendlies were moving to that location. I went to a wider field of view on my (b)(1)1.4a, (b)(1)1.4g and began scanning for threats, as well as searching for friendlies; while our (b)(1)1.4a, (b)(1)1.4g stayed on that location. I think about 10-15 mins later I found 2 PAX southwest of the impact area I believe (b)(1)1.4a, (b)(1)1.4g next to a rock. I told (b)(3), (b)(6) and he informed us he thought the bomb blast knocked out friendly comms in that area. Eventually I saw friendlies with strobes approach and meet these two PAX, so I determined they were friendly. (b)(3), (b)(6) passed a CASEVAC HLZ location that fell very close to the two personnel. After about 30 mins to 1 hr (b)(3), (b)(6) checked off station for air refuel. (b)(3), (b)(6) flight came up comms and told us they were enroute, ETA about 30 mins. and they could act as CASEVAC if that was faster. We relayed to (b)(3), (b)(6) and he acknowledged. (b)(3), (b)(6) (Air Weapons Team) came on station and relayed that (b)(3), (b)(6) flight was CASEVAC. I don't know how but (b)(3), (b)(6) said he already relayed CASEVAC 9-Line to (b)(3), (b)(6), and he repeated it to us later. When (b)(3), (b)(6) found out (b)(3), (b)(6) was enroute, he asked us to relay that they needed litters and space blankets. I was finally able to get hold of (b)(3), (b)(6) on one of our (b)(1)1.4a, (b)(1)1.4g, he informed me that he was SOTF-NE and I relayed the info to him. He said he would relay the (b)(3), (b)(6)

IV. STATEMENT

(b)(3), (b)(6) would relay the information. Eventually, (b)(3), (b)(6) was on the Fires frequency and they informed us that they had litters and space blankets. (b)(3), (b)(6) landed at the CASEVAC HLZ and the friendlies began unloading the litters and first aid equipment, then carried it to the location at the top of the hill. At some point (b)(3), (b)(6) told us he thought it was a possible "Blue on Blue" incident and that it was 5 U.S. and 1 ANVA. Eventually the casualties were loaded onto the (b)(1)1.4a, (b)(1)1.4g I also heard over "Team" frequency that they were going to launch the QRF, we relayed this to (b)(3), (b)(6) and they infiltrated the QRF. Once all the casualties were loaded, the (b)(3), (b)(6) flight took off. I think they went to FOB (b)(1)1.4a, (b)(1)1.4g (b)(3), (b)(6) returned from AR. We were getting close to (b)(3), (b)(6) fuel, we contacted CSSOAC Fires to coordinate a tanker in YETI. (b)(3), (b)(6) was the QRF JTAC and we communicated with him. He called out overt lights at (b)(3), (b)(6) "rough grid." After searching with both (b)(1)1.4a, (b)(1)1.4g for about 5 minutes I found a couple ANVA outposts near his refined grid: (b)(1)1.4a, (b)(1)1.4g. We then dropped them and went back defensive friendlies. Our CZ informed us we had an ARCT of (b)(1)1.4a, (b)(1)1.4g with (b)(1)1.4a, (b)(1)1.4g. Shortly thereafter (b)(3), (b)(6) came on station and our copilot gave them an update brief on a net I was not monitoring. At roughly (b)(1)1.4a, (b)(1)1.4g our CZ, CSSOAC Fires ordered us to go Air-

As we were moving to the tanker track, (b)(3), (b)(6) called out PAX with cylindrical tubes at a grid, I looked at it and it was roughly the QRF position, I told the (b)(3), (b)(6) and we announced it was a friendly grid. We got approximately (b)(1)1.4a, (b)(1)1.4g lbs. of fuel from (b)(3), (b)(6), and I was close enough to monitor the FRES net the whole time. Once we heard wheels up and PZ clear for all HLZ's I contacted (b)(3), (b)(6) and asked them to confirm all PZ's clear, no friends on the ground. They responded in the affirmative. At this point, we disconnected from the tanker and our CZ directed us to RTB. We proceeded back to (b)(1)1.4a, (b)(1)1.4g and landed. (b)(3), (b)(6)

IV. STATEMENT

My name is (b)(3), (b)(6) I served as the lead Special Mission Aviator aboard the (b)(3), (b)(6) on the 9th of June. Our mission/operation that day was (b)(1)1.4a, (b)(1)1.4g and headed straight for our working airspace. The first significant event was a radio call from the controlling STAC (b)(3), (b)(6), declaring a TIC (troops in contact). As we came in to our working airspace we were delayed from entering due to the B-1 Lancers, callsign (b)(3), (b)(6) attempting to deliver a call for fire from (b)(3), (b)(6). After several broken/unreadable radio calls we were able to help (b)(3), (b)(6) and (b)(3), (b)(6) realize that (b)(3), (b)(6) could hear (b)(3), (b)(6) radio transmissions, but that (b)(3), (b)(6) could only hear a few of (b)(3), (b)(6) our Aircraft/crew assisted (b)(3), (b)(6) by relaying a few radio calls. We assisted (b)(3), (b)(6) in passing the coordinates he was trying to get (b)(3), (b)(6) to engage. After we passed the coordinates (b)(3), (b)(6) specifically verified with (b)(3), (b)(6) that he had the correct coordinates for (b)(3), (b)(6) target. (b)(3), (b)(6) proceeded to engage with two GB (b)(1)1.4a, (b)(1)1.4g. Instantly after his weapons impacted the radio became very busy with the ground party about the Mountain valley. Soon after, (b)(3), (b)(6) verified with (b)(3), (b)(6) that (b)(3), (b)(6) did not see any IR marking devices in the vicinity of the target coordinates. (b)(3), (b)(6) replied with negative to any IR marking devices on the target coordinates. (b)(3), (b)(6) then passed that there may have been a potential

"Blue v Blue" incident and then tasked our aircraft/crew to search the target coordinates for any signs of life. Our search found ten pax on the ridge line by the weapon impact. Some were providing CPR/life saving medical care to others. After several radio calls the (b)(3), (b)(6) and other members of his ground party started to coordinate for a medevac lift A.S.A.P., claiming there were six American casualties and one missing AFG Commando. Our Aircraft/crew was tasked to coordinate the medevac helicopters/control the airspace Reo and coordinate for a CREF. The first (b)(1)1.4a, (b)(1)1.4b helicopters took all wounded back to a near by FOB and eventually a lift/exfil element of (b)(1)1.4a, (b)(1)1.4b HH-475 were set to come and exfil the rest of the ground party. The CREF arrived with a new JTAC (b)(3), (b)(6), who several times, verified the target coordinates (b)(3), (b)(6) originally passed to (b)(3), (b)(6). Due to limiting fuel, our crew was directed by our C2 to head to a tanker to aerial refuel. Another (b)(1)1.4a, (b)(1)1.4b crew had shown up ten minutes prior to cover the rest of the ground parties exfil as we received fuel. The ground party was ex-filed before we could return overhead and we were then directed to RTB.

MEMORANDUM FOR RECORD

SUBJECT: ~~(S//REL USA, ISAF, NATO)~~ Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - (b)(3), (b)(6) (Task Force (b)(1)1.4a, (b)(1)1.4g CDR)

1. At 1300Z, MG Harrigian interviewed (b)(3), (b)(6) (Task Force (b)(1)1.4a, (b)(1)1.4g) CDR at FOB (b)(1)1.4a, (b)(1)1.4g. In the discussion, (b)(3), (b)(6) began by describing the (b)(1)1.4a, (b)(1)1.4g uplift team and the relationship with the ODA teams. He mentioned that (b)(1)1.4a, (b)(1)1.4g supports almost every mission conducted by either (b)(3), (b)(6). The working relationship is very good, and that they cooperate well and complement each other. He mentioned that the ODAs can provide things like dog teams and EOD, while (b)(1)1.4a, (b)(1)1.4g can support the ODAs with route clearance, gun teams, drivers, and vehicles. (b)(3), (b)(6) said that coordination happens quickly because of constant communication and monitoring. During ODA missions, (b)(1)1.4a, (b)(1)1.4g is either the primary Quick Response Force (QRF) effort or the secondary QRF element.
2. Following this, (b)(3), (b)(6) detailed what he knew about the QRF mission on 9 June, 2014. He mentioned that he had (b)(1)1.4a, (b)(1)1.4g QRF teams aligned against the operation. This quantity of QRF teams seemed unusual to the investigation team, and we were unclear on what it meant. (b)(3), (b)(6) went on to say that once ODA (b)(3), (b)(6) requested QRF, SOTF-S requested that the Air Response Force (ARF) and the primary QRF, ODA (b)(3), (b)(6) go together to the site. (b)(3), (b)(6) said that RC-S and SOTF-S make the decision on who goes. They were making the decision regarding whether to leave ground forces in overnight, and the ground forces believed they had accounted for the remains of the five US soldiers and parts of Afghan remains (including a boot of the Afghan soldier and parts of his uniform). (b)(3), (b)(6) said that they thought they had all six soldiers recovered and so they made the decision to bring the ground force out.
3. (b)(3), (b)(6) was then asked about the remains (CPL Justin Clouse) found the next day, to which he recalled that they had (b)(1)1.4a, (b)(1)1.4g (b)(1)1.4a, (b)(1)1.4g, and that they didn't pick up any other remains. However, the next morning they saw additional remains on the (b)(1)1.4a, (b)(1)1.4g. He said that in hindsight, it was apparent that the conditions of the remains prevented complete identification on the night of the operation. (b)(3), (b)(6) then explained that 30 Afghans and three Special Forces individuals went in to clear the rest of the remains, and that the reason the remains hadn't been found was that they were approximately 15 meters outside of the 50 meter search radius the QRF team had covered the night before. A joint US and Afghan ramp ceremony was held at Kandahar Air Field for the six soldiers killed, and additional ceremonies were conducted at the unit level.

4. The last topic covered was the issue of outdated or non-existent ISOPREP records for some of the deceased. (b)(3), (b)(6) said that this was due primarily to system issues, in which many soldiers were unable to upload their completed profiles into the ISOPREP system, and that they were working to correct this problem. After researching the issue, (b)(3), (b)(6) had found that about 60 soldiers in his unit had incomplete or missing profiles.

5. To close, MG Harrigian had a follow up discussion with (b)(3), (b)(6) in which they discussed the status of the unit, continuing relationship with the AOB and communications with the families. While both the unit and the relationship with the AOB continued to be positive, (b)(3), (b)(6) indicated that he had talked with the families and that they inquired about the status of the investigation. He mentioned that as soon as possible he was interested in gaining the final report to facilitate a discussion with the families.

SUBJECT: ~~(S//REL USA, ISAF, NATO)~~ Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - Interview with [REDACTED] Expeditionary Bomb Squadron Flight Surgeon.

1. Maj Gen Harrigian opened the conversation with an introduction of the subject and request to understand 1) what Dexedrine does for the crew. 2) Specifics of how Dex (or equivalent) is distributed/tracked and 3) overall health assessment of the crew. [REDACTED] stated that Dex is a stimulant used to help the crew focus given the length of the sorties that they fly (only available for sorties greater than 12 hrs). All crew members must be ground tested prior to use and this is documented in their medical records. One full dose is 2 pills and crew members are issued (if desired) 4 pills for a mission, of course issuance of these is optional for crew members. The full dose (2 pills) lasts for 4-6 hours. Crew members are required to turn in (post flight) any unused meds to the flight surgeon. [REDACTED] also noted that crew members may also use Ambien or Restoril to assist in sleeping prior to missions. Finally, [REDACTED], who has been the Squadron Flight Surgeon for a couple of years, indicated that he was quite familiar with this crew and noted that they all were healthy with no issues that precluded them from flying.

SUBJECT: ~~(S//REL USA, ISAF, NATO)~~ Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - Interview of (b)(3), (b)(6) (b)(1)1.4a, (b)(1)1.4g Commander

1. Maj Gen Harrigian met with (b)(3), (b)(6) at Camp Alpha to discuss issues associated with (b)(3), (b)(6) (b)(3), (b)(6). Maj Gen Harrigian asked first about (b)(3), (b)(6) apparent reduction in rank. (b)(3), (b)(6) indicated that (b)(3), (b)(6) (b)(3), (b)(6). This occurred when he was returning from a training event (exact date was not clear). Maj Gen Harrigian then asked if (b)(3), (b)(6) was aware of the reason for (b)(3), (b)(6) removal from training for the (b)(1)1.4a, (b)(1)1.4g STS. He did not know the exact reason, but indicated that some people are not cut out for the (b)(1)1.4a, (b)(1)1.4g STS, but that (b)(3), (b)(6) was a skilled JTAC.

2. Maj Gen Harrigian then asked about the timing of the swap between (b)(3), (b)(6) (previous JTAC for ODA Tm (b)(1)1.4a, (b)(1)1.4g) and (b)(3), (b)(6) (b)(3), (b)(6) indicated that 48 hours was the minimum time he required (this occurred) and while not optimal, they pushed (b)(3), (b)(6) rotation out of country as far as they could to the right to ensure they had a handover without breaking dwell time requirements. He went on to state that this drove (b)(3), (b)(6) to almost miss his flight back to the states. Maj Gen Harrigian then asked about the swap of CJOA-A locations that occurred (from an original location in the East to SOTF-S). (b)(3), (b)(6) stated that right after deploying, he was notified that (b)(3), (b)(6) was not going to be retained by the Air Force due to the quality force reductions the Air Force is currently undergoing. The Air Force (separation) timeline would not allow (b)(3), (b)(6) to stay for the entire deployment, so (b)(3), (b)(6) decided to swap him to RC-S so his redeployment timeline would align with ODA Tm (b)(1)1.4a, (b)(1)1.4g). Though this would impact (b)(3), (b)(6) prep, they discussed this and felt he could still be ready to support SOTF-S. Further, they discussed the implications of not being retained, and while disappointed, they both agreed that (b)(3), (b)(6) wanted to deploy

3. Finally, Maj Gen Harrigian asked (b)(3), (b)(6) to describe some of the situational tools that were commonly used by JTACs. He mentioned the use of the (b)(1)1.4a, (b)(1)1.4g with (b)(1)1.4a, (b)(1)1.4g were the most common tools leveraged for positional situational awareness.

SUBJECT: (~~S//REL USA, ISAF, NATO~~) Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - Interview With Ground Liaison Officer (GLO)

1. Maj Gen Harrigian opened the discussion by informing (b)(3), (b)(6) of the purpose of the 15-6 team. He went on to introduce each member of the team. (b)(3), (b)(6) then introduced himself and said that he had been with the unit for over 2 years and deployed with the unit in (b)(3), (b)(6) (b)(3), (b)(6). The first few months he had been on the carrier and for the past month had been at (b)(1).4a, (b)(1).4g with the unit. Maj Gen Harrigian asked (b)(3), (b)(6) how mission planning is generally performed. (b)(3), (b)(6) indicated that he worked with the ground units to receive/review the CONOPS and on occasion talked with the JTAC. In most cases he worked with the Fires element to coordinate the mission products. He compares/updates mission products so he can brief them to the aircrew. On this mission, he worked with (b)(3), (b)(6) from the SOTF fires element to coordinate this mission and downloaded the CONOP and GRGs from the the SOTF Fires Portal. He noted that the update with (b)(3), (b)(6) revealed nothing unusual.
2. (b)(3), (b)(6) went on then to describe the CONOP and how he briefed the CONOP to the aircrew. He generally described the CONOP (phase lines, locations, infil/exfil times) and how he delivered this to the crew. He indicated a slide was in the mission brief (PPT) presented to the aircrew. Maj Gen Harrigian asked if GRGs were associated with this CONOP and (b)(3), (b)(6) believed they were. The GRGs were not with the CONOP, but (b)(3), (b)(6) indicated he would research and report back. (b)(3), (b)(6) had a piece of paper that contained his briefing notes (this paper was provided to the team.). When asked if the aircrew had any specific questions for (b)(3), (b)(6) he stated that he could not recollect any specific questions they had on the CONOP. (b)(3), (b)(6) asked if there was a specific threat that (b)(3), (b)(6) briefed to which (b)(3), (b)(6) (b)(3), (b)(6) replied that he did not brief it, but believed there was a slide provided by the either INTEL or the fires element.
3. Maj Gen Harrigian asked if (b)(3), (b)(6) had anything additional to add and (b)(3), (b)(6) indicated no. This concluded the interview.

1. At 1530Z, Maj Gen Harrigian interviewed (b)(3), (b)(6) regarding the AC-130 mission supporting Op (b)(1)1.4a, (b)(1)1.4g on the night of 9 June, 2014. (b)(3), (b)(6) said that the op was tasked to his squadron. He indicated that due to maintenance issues they launched approximately an hour late. They were checking in, but were told to remain clear of the airspace because a B-1 was executing kinetic operations. He then mentioned that if it took extra time between the 9 line and delivery that would surprise him. (b)(3), (b)(6) also said that (b)(1)1.4a, (b)(1)1.4g had been postured before the strike to provide coverage for enemy (b)(1)1.4a, (b)(1)1.4g. Further, he discussed the support (b)(1)1.4a, (b)(1)1.4g provided as the (b)(1)1.4a, (b)(1)1.4g and in the overwatch position for the CASEVAC.

2. Following this, (b)(3), (b)(6) discussed the AC-130 (b)(1)1.4a, (b)(1)1.4g and its capabilities. He said that it is (b)(1)1.4a, (b)(1)1.4g and that it detects (b)(1)1.4a, (b)(1)1.4g in some circumstances, but not all. He also mentioned that (b)(1)1.4a, (b)(1)1.4g detection works slightly better if the (b)(1)1.4a, (b)(1)1.4g is manually set with the (b)(1)1.4a, (b)(1)1.4g on, but that they only use that option occasionally. (b)(3), (b)(6) also talked about other ways of identifying positions, including a (b)(1)1.4a, (b)(1)1.4g

SUBJECT: ~~(S//REL USA, ISAF, NATO)~~ Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - Interview With SOTF-S JOC Members

1. At 1650Z, Maj Gen Harrigian interviewed (b)(3), (b)(6) (SOTF-S JOC Battle Captain). He reported that the Troops in Contact (TIC) first occurred as he came on shift. He received small updates through the ODA (b)(1)1.4a, (b)(1)1.4g Ground Force Commander (GFC), which came in through (b)(1)1.4a, (b)(1)1.4g (b)(3), (b)(6) recalled that (b)(1)1.4a, (b)(1)1.4g was getting ready to leave when one of their positions started taking fire. He said the GFC reported effective fire and provided a grid. (b)(3), (b)(6) said that the close grid reference of (b)(1)1.4a, (b)(1)1.4g meters separation between the friendly forces and the enemy stuck out as being abnormally close. (b)(3), (b)(6) did not talk much with the GFC and did not know the level of communication the GFC had with other JOC members. He remembers the GFC was adamant about dropping munitions. (b)(3), (b)(6) mentioned that he had never witnessed a GFC being declined Close Air Support, but that the JOC simply gets the info and pushes it to CJSOTF-A. (b)(3), (b)(6) then detailed the aftermath of the impact, in which a 9 line came through for potential WIAs. Since the situation didn't feel right, the JOC waited for further updates. Eventually, a report of five KIA came through, and everyone came to the JOC floor. (b)(3), (b)(6) said that he doesn't focus particularly on (b)(1)1.4a, (b)(1)1.4g because they often shift, not that he didn't witness any (b)(1)1.4a, (b)(1)1.4g. He also mentioned that there was a lot of radio activity afterward, as RC-S was trying to figure out where the response helicopters would come from, but that the Quick Response Force (QRF) and medevac ended up arriving about the same time.

2. At 1705Z, Maj Gen Harrigian interviewed (b)(3), (b)(6) (Fires Support Officer). He recalled the team being in PZ posture, and that they indicated a positive ID on enemy locations that they would engage. He mentioned that nothing else was heard until a 9 line came through on (b)(1)1.4a, (b)(1)1.4g. This was a non-standard call, since (b)(1)1.4a, (b)(1)1.4g is used primarily. (b)(3), (b)(6) said that the Fires computer is updated with the event, and that the medevac call came through on the (b)(1)1.4a, (b)(1)1.4g as well. Once the team plotted it, it looked as though the bomb may have dropped short. (b)(3), (b)(6) did not recall the GFC asking for approval to drop.

3. At 1720Z, Maj Gen Harrigian interviewed (b)(3), (b)(6) (SOTF-S Battle NCO). He mentioned that he works regularly with the Battle Captain and a JTAC within the JOC. He recalled that the team was taking contact about the time that (b)(1)1.4a, (b)(1)1.4g arrived on station. Moments later, they said that (b)(1)1.4a, (b)(1)1.4g had dropped. Communication between the JOC and the GFC went back and forth between (b)(1)1.4a, (b)(1)1.4g (b)(3), (b)(6) said that once the impact happened, the JOC tried to figure out why the weapons had landed where they did and not where the enemy was.

4. At 1730Z, Maj Gen Harrigian interviewed (b)(3), (b)(6) (SOTF-S OPCEN Dir). (b)(3), (b)(6) reported that he heard something had gone wrong, and that the GFC was on (b)(1)1.4a, (b)(1)1.4g sounding very upset. The initial presumption within the JOC was that the bombs had fallen short. He said that at this point he called (b)(3), (b)(6), according to wake-up criteria and CCIRs. According to (b)(3), (b)(6), ROE is relative to the situation. Civilian casualties are considered, as well as the situation that the GFC is in. Withdrawal is the preferable COA if possible. He recalled that the Battle Captain did not get called until something went wrong. They were trying to get the other ODA team out to help secure. After this, the medevac happened, and it looked as though it might have been a direct hit. (b)(3), (b)(6) concluded by recounting the recovery of a sixth body which was found the next day outside of the original search area.

5. At 1745Z, Maj Gen Harrigian interviewed (b)(3), (b)(6) (SOTF-S JOC). (b)(3), (b)(6) recalled that on 9 June, the security elements for (b)(1)1.4a, (b)(1)1.4g were already in PZ posture when they called in with a Troops in Contact at about (b)(1)1.4a, (b)(1)1.4g. At that point they got everybody unnecessary off of the JOC floor. (b)(3), (b)(6) then relayed that the ground forces had (b)(1)1.4a, (b)(1)1.4g lined up. The JOC got the grids for the friendly location and for the enemy position. Shortly thereafter, the Battle Captain said that something was wrong. The GFC or the JTAC was sending information mostly with (b)(1)1.4a, (b)(1)1.4g but they ended up calling in on (b)(1)1.4a, (b)(1)1.4g after the bomb impact. (b)(3), (b)(6) then told Maj Gen Harrigian that the team had reported three friendly WIA. At this point, (b)(3), (b)(6) began passing the 9 line. A correction came through that indicated five friendly KIA plus one Afghan National Army KIA. The medevac was on the way, and the ARF/QRF forces were sent in. (b)(3), (b)(6) said that the JOC members had tried to confirm the coordinates with the ground crew because they were so close, but that they were unsuccessful.

SUBJECT: ~~(S//REL USA, ISAF, NATO)~~ Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - Interview with (b)(3), (b)(6)

1. At 1130Z, Maj Gen Harrigian and the team visited the (b)(3), (b)(6) control center and spoke with (b)(3), (b)(6), (b)(3), (b)(6) (Joint Air Support Network Operator) and (b)(3), (b)(6).

2. The visit began with (b)(3), (b)(6) introducing Maj Gen Harrigian to the operations center and giving a brief on their operational processes. (b)(3), (b)(6) relayed that air asset movement and usage are primarily dictated by the IJC CAS Priority Letter. (b)(3), (b)(6) outlined the role of the SODO in (b)(3), (b)(6) decisions, and that logistics also play a role in air asset movement. After this, (b)(3), (b)(6) informed the team of the operational blind spots inherent with SOF air assets. Finally, (b)(3), (b)(6) discussed the escalation of ground activities, how these are communicated to the control team, and the relationship of ground contact to the priority of air assets, mentioning that only Ground Force Commanders (GFCs) authorize closing Troops in Contact (TIC) incidents.

3. Following the introduction to the operations center, Maj Gen Harrigian spoke with (b)(3), (b)(6) about the incident on the night of 9 June 2014. (b)(3), (b)(6) remembered the event, recalling that it wasn't out of the ordinary until the impact. He stated that the team had received some sporadic fire, and that he was called by the JTAC from RC-S to discuss the incident. The confirmation of five KIA was passed, and he asked to stay updated as the event progressed. (b)(3), (b)(6) understanding of the incident was that it was a weaponing or weapons release problem. (b)(3), (b)(6) stated that the B-1 (b)(1)1.4a, (b)(1)1.4b was the only asset (b)(1)1.4a, (b)(1)1.4b was aware of, and that the team allocated (b)(1)1.4a, (b)(1)1.4b to the site once the incident occurred.

4. Maj Gen Harrigian also spoke briefly with the (b)(3), (b)(6) stated that the (b)(1)1.4a, (b)(1)1.4b team will occasionally ask what assets are at a site; usually to determine if they can pull an asset off for alternative use. (b)(3), (b)(6) reiterated the lack of visibility on AC-130 gunships, but also stated that they are sometimes able to use them, depending on the circumstances at the time. (b)(3), (b)(6) relayed to the team that the GFC and the JTAC have the primary responsibility for relaying air support needs to the control center.

SUBJECT: ~~(S//REL USA, ISAF, NATO)~~ Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 (b)(1)1.4a, (b)(1)1.4c Crew Medical and Training Review

1. We have reviewed the flight records and Flight Evaluation Folders (FEFs) for the aircrew in order to record supporting data and annotate any discrepancies. The records indicated that each crew member was performing in a capacity appropriate to what they were qualified for (IAW the Letter of X's). It was the first B-1B combat deployment for (b)(3), (b)(6) and (b)(3), (b)(6). According to the unit's Go-No/Go records, which require the aircrew to be current in the listed tasks in order to fly, the only discrepancy was (b)(3), (b)(6) showing overdue for 'Boldface' and 'SEPT'. However, other documentation supported the fact that they had been completed. A review of the unit's 'Boldface' and 'SPINS' showed that each aircrew member had completed both exams with no questions missed. The records also indicated that none of the aircrew exceeded the maximum number of flight hours for 7-, 30-, and 90-day limits.

2. We received the medical records and 72-Hour History (EMDGI 48-06, 29 July 2008) of the aircrew from Flight Medicine. They were reviewed for accuracy, unusual events, and previous/current mental health and medical problems. None of them had any history of mental illness or reports of unusual events. In addition, they were each cleared for flying status and current on immunizations. (b)(6)

[redacted] (b)(3), (b)(6) explained the decertification was resultant from [redacted] (b)(3), (b)(6) selecting unsafe attack headings twice during a live munitions employment CAS mission with [redacted] (b)(1)1.4a, (b)(1)1.4g. [redacted] (b)(3), (b)(6) explained the initial final attack heading selected was directly over the friendly position, and when prompted to change the attack heading, [redacted] (b)(3), (b)(6) selected an attack heading [redacted] (b)(1)1.4a, (b)(1)1.4g degrees from the original heading making the final attack directly at the friendly position on a live 30mm strafe pass. SUBJECT: (S//REL USA, ISAF, NATO) Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 18 June 2014 – Reflections from the interview with (b)(3), (b)(6)

(b)(3), (b)(6)

1. During the interview of (b)(3), (b)(6) with the investigative officer the following pertinent information reference (b)(1)1.4, 1.4g was conveyed.

2. (b)(3), (b)(6) stated that there were several mission rehearsals of some degree, but there was not a full dress rehearsal with all of the associated elements that formed the task organization of the operation. Additionally, while the QRF was notified of the operation and received the concept of the operation and associated communication plan they did not however, conduct any rehearsals with ODA (b)(1)1.4, 1.4g or Task Force (b)(1)1.4, 1.4g elements that formed the Air Reaction Force.

3. (b)(3), (b)(6) assessment of the (b)(1)1.4, 1.4g Kandak soldiers was not optimistic as he stated that several times he had to request that the ANA soldiers continue to clear the compounds within the Gaza Valley. Reportedly the Afghan soldiers were taking multiple breaks because of the heat and were not thorough in their clearance techniques.

(b)(1)1.4, 1.4g

5. (b)(1)1.4, 1.4g claimed (b)(3), (b)(6) was the last operation that ODA (b)(1)1.4, 1.4g was going to conduct during this deployment before beginning to conduct relief in place/transfer of authority with an incoming (b)(3), (b)(6) ODA.

6. (b)(3), (b)(6) mentioned that he had communications issues with Special Operations Task Force – South especially while he was attempting to inform them about the close air support that he was requesting. (b)(3), (b)(6) mentioned that he had to move his (b)(1)1.4, 1.4g radio several times to improve signal strength (b)(1)1.4, 1.4g.

7. After reviewing the (b)(1)1.4a, (b)(1)1.4g of the operational area that (b)(3), (b)(6) was carrying there are no distinguishing marks that would indicate that he plotted the updated friendly grid locations of (b)(1)1.4, 1.4g position or the suspected enemy locations.

SUBJECT: (U//~~FOUO~~) Investigation of Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 – Identification of the Deceased

1. (U//~~FOUO~~) On 19 June 2014, a member of the Investigation Team visited the Kandahar Air Field (KAF) Mortuary and obtained documentation relating to the six soldiers who were killed by the airstrike on 9 June 2014. The Mortuary records evidence that three of the soldiers (SSG Scott Studenmund, SSG Juston McDonald, and SPC Justin Helton) were identified by (b)(3), (b)(6) (b)(3), (b)(6), a physician with SOTF-S. A fourth soldier, PV2 Aaron Toppen, was identified by the DoD Identification Card found on his person. Two bodies and disassociated remains were not able to be identified by the Mortuary. The remains were transported from KAF Mortuary to Dover on 11 June 2014.

2. (U//~~FOUO~~) On or about 17 June 2014, the Deputy Medical Examiner at Dover Air Force Base, completed DNA testing and Death Certificates identifying the six soldiers killed on 9 June 2014 as: SSG Scott R. Studenmund, SSG Jason A. McDonald, SPC Juston R. Helton, CPL Justin R. Clouse, PV2 Aaron S. Toppen, and SSG Gulbuddin Ghulam Sakhi). The Medical Examiner's office also confirmed that the body of the ANA soldier, SSG Gulbuddin Ghulam Sakhi, was repatriated on a flight to Kandahar, Afghanistan that departed Dover AFB on 2 July 2014.

MEMORANDUM FOR RECORD

SUBJECT: (~~S//REL USA, ISAF, NATO~~) Fixed Wing Close Air Support Airstrike In the Vicinity of Arghandab, Afghanistan on 9 June 2014 - Update Meeting with LtGen Hesterman (CFACC/AFCENT CDR), Maj Gen Lofgren (DCFACC/Deputy AFCENT CDR) and Brig Gen Hartford (379 AEW CDR) @ 1200Z

1. Maj Gen Harrigian provided the leadership an update on the investigation and current actions (FCIF and Red Stripe). Discussion included a background on the key players (B1 crew, GFC and JTAC), mission planning and execution. It was decided by all that the B1 crew would not fly combat missions in support of OEF until the investigation was complete. Further, the Wing leadership would work with the Squadron leadership to determine where the crew would be best cared for (decision for redeploying the crew will rest with the Wing leadership). All were in agreement on the way ahead

SUBJECT
FCIF 14-05B: Friendly Identification Capabilities

1. (~~S//REL~~) It is imperative aircrew be familiar with the characteristics of friendly ground marking devices such as IR markers and strobes to determine friendly location(s). Furthermore aircrew must ensure they understand the capability and limitations of each of their aircraft's systems/sensors to detect these friendly ground marking devices.

2. (U) In accordance with joint procedures, the location of friendly forces should be known by all participants. This is a more positive measure than identifying where the friendly forces are NOT located. Joint Publication 3-09.3 "Close Air Support" states, "Each participant must make every effort possible to identify friendly units, enemy forces, and civilians correctly prior to targeting, clearing fires, and weapons release."

Jeff,

Confirmed. I discussed with both Cdr CJSOTF and CJSOAC and both acknowledge that the three individuals will not conduct any future combat operations until cleared by me.

Ed,

Thanks again for your time, support and engagement on the investigation...based on where we are at, I recommend that both the ODA Team leader and Team Sergeant, along with the JTAC, not execute any further Combat operations until the investigation is complete. If so, can I ask for your confirmation so I can update Gen Austin? Of note, discussed this with LtGen Hesterman and he is taking the same approach with the B-1 crew. Please let me know if you have any questions/concerns.

Thanks

(U//~~FOUO~~) B-1 aircrew members fly with one of two night vision devices: the AN/AVS-9 or AN/AVS-10. Both have IR detectors sensitive to IR radiation from 0.6 to 0.9 microns. (Jane's Electro-Optic Systems, 2014) (Jane's Electro-Optic Systems, 2013) The B-1 is also equipped with the AAQ-33 Sniper Advanced Targeting Pod (ATP). The Sniper ATP is equipped with a mid-wave IR detector sensitive to radiation in the 3.0 to 5.0 micron region, *making it incapable of detecting most covert markers*. (Jane's C4ISR & Mission Systems: Air, 2013) For example, the Phoenix Firefly Jr (IR-14) that most USAF aircrew fly with emits at 0.88 microns and is visible with the AVS-9 and AVS-10 devices. (Own the Night, 2007) All Cyalume chemical illumination sticks designed for covert military application emit from 0.7 to 0.9 microns, with a peak output at 0.8 microns. (Cyalume Technology) Although no specific information is readily available regarding the output of the MS-2000M, SDU-5, or SDU-39 beacons, it is known that the AVS-9 and AVS-10 can detect them. An assumption could be made that the light emitted from those beacons is similar to the Phoenix Firefly Jr and also operates around 0.8 to 0.9 microns. Figure 1, overlays the capabilities of all the strobes with the detection capabilities of the AVS-9 and AVS-10 as well as the Sniper ATP.

FROM: 379 EAMXS/MXA

SUBJECT: Aircraft 86-111 Sniper Pod 10586 Operational Checks

1. On 17 Jun 14, [redacted (b)(3), (b)(6)] spearheaded the performance of maintenance operational function checks on Sniper Pod 10586 to facilitate an ongoing investigation.

2. Sniper Pod 10586 required a functional check and data download in accordance with 1B-1B-2-94JG-70-1. The operation check is broken down into seven tasks, and all applicable notes, cautions, and warnings were adhered to. The tasks and the results are listed below.

- 3-1 Preparation
- C/W
- 3-2 Sniper Pod start-up Built-In-Test
- Passed no defects noted
- 3-3 Sniper Pod Initiated Built-In-Test
- Passed no defects noted
- 3-4 Sniper Pod auto boresight
- Passed no defects noted
- 3-5 Sniper Pod Forward Looking Infrared
- Passed no defects noted
- 3-6 Sniper Pod ground operations test
- Passed no defects noted
- 3-7 Restoration
- C/W

3. On 17 Jun 14, Lockheed Martin engineers received Pod 10586's Portable Maintenance Aid data via the Sniper Spares technical assistance system. They reviewed the pod data from the period that extended from [redacted (b)(1) 1.4a, (b)(1) 1.4g] on the sortie that aircraft 86-111 flew on 8 Jun 14.

4. If you have any questions, please contact me at [redacted (b)(3), (b)(6)].

**SNIPER ATP-SE PROGRAM
Engineering Review
of the
BIT Log for ATP-SE Pod SN10586**

Date: 19 June 2014

BACKGROUND:

In response to phone conversations between Precision Attack System Program Office (PASPO) Engineer (b)(6) USAF AFMC AFLCMC/WNQE and Lockheed Martin Missiles and Fire Control (LMMFC) on June 18th, 2014, LM has conducted a detailed review of the Built-In-Test (BIT) log file from Advanced Targeting Pod – Sensor Enhancement (ATP-SE) SN 10586. The following paragraphs document the findings from LMMFCs review of BIT log file 10586_210140617_B1-B.TXT provided by Ellsworth Air Force Base on 17 June 2014.

REVIEW RESULTS:

LMMFC confirmed there were exactly three separate issues over a six month period, all on the ground during SBIT, and all cleared prior to flight operations by a subsequent power cycle. None of the three issues resulted in a pod failure requiring any maintenance. None of the issues would have affected the operational performance of the pod, and in fact, the pod remained fully mission capable (FMC) at all times.

The most recent report occurred on pod power cycle number 139 between June 9th, 2014 and June 17th, 2014. The logging was the result of the Multi-Sensor Interface (MSI) mezzanine Electronic Card Assembly (ECA) temperature sensor reporting an “out of range” temperature value. This is reported in the BIT log as an **MsiMezTempSensor** Degraded and reported as a LRU 314 (MSI) BIT callout.

The second report, a FLIR Memory Test, logged as a **FlirMemoryTests** Degraded occurred on pod power cycle number 127 on May 31, 2013. The FLIR Memory Test checks the results of the 1K FLIR’s memory tests. These tests are performed by the pod prior to first FLIR calibration following power-on. If the pod had an actual FLIR memory failure, the FLIR video would have been “unusable”.

The December 13th, 2013 log was the result of the Start-up BT (SBIT) measurement of the Laser Markers voltage and current being out of tolerance. These are logged as **ScPartialBstLMVoltage** and **ScPartialBstLMCurrent** fail. These failed tests would have resulted in a LRU 213 (Forward Power Supply B) BIT callout.

CONCLUSION:

LMMFC review of the pod SN 10586 BIT log file 10586_210140617_B1-B.TXT indicates the pod was fully mission capable throughout the period covered in the BIT log.
