**SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS**

## Section 101—Authorization of Appropriations

This section would authorize appropriations for procurement at the levels identified in section 4101 of division D of this Act.

### SUBTITLE C—NAVY PROGRAMS

#### Section 122—Construction of San Antonio Class Amphibious Ship

This section would provide the Secretary of the Navy incremental funding authority to enter into a contract for the ship construction of a San Antonio class amphibious ship.

### SUBTITLE D—AIR FORCE PROGRAMS

#### Section 132—Limitation on Availability of Funds for Retirement of U-2 Aircraft

This section would prohibit the obligation or expenditure of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2015 to make significant changes to retire, prepare to retire, or place U-2 aircraft in storage.

#### Section 133—Limitation on Availability of Funds for Retirement of A-10 Aircraft

This section would limit funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2015 for the Department of Defense to be obligated or expended to retire A-10 aircraft unless each such retired aircraft is maintained in type-1000 storage. In this section, the term “type-1000 storage” means storage of a retired aircraft in a near-flyaway condition that allows for the aircraft to be recalled into use by the Regular or Reserve Components of the Department of the Air Force.

#### Section 134—Limitation on Availability of Funds for Divestment or Transfer of KC-10 Aircraft

This section would prohibit the Secretary of the Air Force from using any funds or taking any action during fiscal year 2015 to divest or transfer, or prepare to divest or transfer, any KC-10 aerial refueling aircraft of the Air Force.

## TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

### LEGISLATIVE PROVISIONS

#### SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

## Section 201—Authorization of Appropriations

This section would authorize appropriations for research, development, test, and evaluation at the levels identified in section 4201 of division D of this Act.

# TITLE III—OPERATION AND MAINTENANCE

## LEGISLATIVE PROVISIONS

### SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

#### Section 301—Operation and Maintenance Funding

This section would authorize appropriations for operation and maintenance activities at the levels identified in section 4301 of division D of this Act.

### SUBTITLE B—ENERGY AND ENVIRONMENTAL PROVISIONS

#### Section 312—Exclusions from Definition of "Chemical Substance" Under Toxic Substances Control Act and Report on Lead Ammunition

This section would modify section 2602(2)(B) of title 15, United States Code, to add to the exclusions any component of any article including shot, bullets and other projectiles, propellants when manufactured for or used in such an article, and primers. This section would also require the Secretary of the Army to submit a report to the congressional defense committees not later than September 30, 2015, that would detail the costs for the procurement of small arms alternative lead ammunition and the qualification of non-lead alternatives, and include an assessment of which non-lead variants of ammunition exist.

### SUBTITLE D—REPORTS

#### Section 332—Report on Enduring Requirements and Activities Currently Funded Through Amounts Authorized to Be Appropriated for Overseas Contingency Operations

This section would require the Secretary of Defense to submit to the congressional defense committees concurrent with the President's budget for fiscal year 2016, pursuant to section 1105 of title 31, United States Code, a one-time assessment of enduring mission requirements, equipping, training, sustainment, and other operation and maintenance-related activities of each military department, combat support agency, and the Department of Defense currently funded through the Overseas Contingency Operations (OCO) budget. The provision also requires associated funding information and a 3-year migration plan to move enduring requirements funding into the base budget.

The committee is concerned about the large portion of enduring activities, training, sustainment, and other military requirements being funded through amounts authorized to be appropriated for OCO. The committee believes the Department of Defense is accepting high levels of risk in continuing to fund non-contingency related activities through the OCO budget and has not fully articulated the scope of enduring OCO-funded activities or a clear path forward in migrating enduring requirement resources to the base budget.

#### SUBTITLE F—OTHER MATTERS

##### Section 352—Sense of Congress on Access to Training Ranges within United States Pacific Command Area of Responsibility

This section would express the sense of Congress regarding access to training ranges within U.S. Pacific Command's area of responsibility.

### TITLE V—MILITARY PERSONNEL POLICY

#### LEGISLATIVE PROVISIONS

##### SUBTITLE D—MILITARY JUSTICE, INCLUDING SEXUAL ASSAULT AND DOMESTIC VIOLENCE PREVENTION AND RESPONSE

##### Section 534—Consultation with Victims of Sexual Assault Regarding Victims' Preference for Prosecution of Offense by Court-Martial or Civilian Court

This section would require the Secretary concerned to establish a procedure to ensure a victim of an alleged sexual-related offense is consulted regarding the victim's preference for prosecution authority by court-martial or a civilian court with jurisdiction over the offense.

##### Section 535—Modification of Military Rules of Evidence Relating to Admissibility of General Military Character Toward Probability of Innocence

This section would require the Secretary of Defense to modify the Military Rules of Evidence to make clear that the general military character of an accused is not admissible for the purpose of showing the probability of innocence except when the trait of the military character of an accused is relevant to an element of an offense for which the accused has been charged.

##### Section 536—Confidential Review of Characterization of Terms of Discharge of Members of the Armed Forces Who Are Victims of Sexual Offenses

This section would require the Secretaries of the military departments to establish a confidential process for victims of a sex-related offense to appeal,

through boards for correction of military records, the characterization of discharge or separation of the individual from the Armed Forces.

## TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

### LEGISLATIVE PROVISIONS

#### SUBTITLE A—PAY AND ALLOWANCES

##### Section 602—No Fiscal Year 2015 Increase in Basic Pay for General and Flag Officers

This section would freeze the basic pay rate for commissioned officers in the pay grades of O-7 through O-10 during calendar year 2015.

## TITLE VII—HEALTH CARE PROVISIONS

### LEGISLATIVE PROVISIONS

#### SUBTITLE C—REPORTS AND OTHER MATTERS

##### Section 727—Briefing on Hospitals in Arrears in Payments to Department of Defense

This section would require the Secretary of Defense, within 60 days after the date of enactment of this Act, to brief the congressional defense committees on the process used by the Defense Health Agency to collect payment from hospitals outside the Department of Defense. The briefing would include a list of each hospital that is more than 90 days in arrears in payment to the Secretary.

## TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

### LEGISLATIVE PROVISIONS

#### SUBTITLE A—AMENDMENTS TO GENERAL CONTRACTING AUTHORITIES, PROCEDURES, AND LIMITATIONS

##### Section 801—Extension to United States Transportation Command of Authorities Relating to Prohibition on Contracting with the Enemy

This section would amend section 831(i)(1) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) to add United States Transportation Command to the list of covered combatant commands.

## SUBTITLE B—INDUSTRIAL BASE MATTERS

### Section 811—Three-Year Extension of and Amendments to Test Program for Negotiation of Comprehensive Small Business Subcontracting Plans

This section would modify and extend the test program for negotiation of comprehensive small business subcontracting plans authorized by section 402 of the Small Business Administration Reauthorization and Amendments Act of 1990 (Public Law 101-574) and last amended by section 866 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81).

The committee notes that the test program was authorized to allow contracting activities in the military departments and the defense agencies to undertake one or more demonstration projects to determine whether the negotiation and administration of comprehensive subcontracting plans would reduce administrative burdens on contracts while enhancing opportunities for small business concerns. However, after nearly 24 years since the original authorization of the program, the test program has yet to provide evidence that it meets the original stated goal of the program in the committee report (H. Rept. 101-331) accompanying the National Defense Authorization Act for Fiscal Years 1990 and 1991: “to be more advantageous to both the government and to small and small disadvantaged businesses,” and “to expand available participation in a broader range of subcontracting opportunities, especially in the technical area.”

Therefore, this section would include additional requirements to ensure that the test program collects the data necessary to assess its effectiveness and to standardize its requirements with other subcontracting programs:

(1) The test program would be expanded to apply to all of the small business subcontracting goals, as the committee believes that the program was not intended to ignore additional subcontracting programs of the Federal Government;

(2) The threshold for participation in the program would be raised from \$5.0 million to \$100.0 million because the test program was intended to apply to contractors with a substantial presence in defense acquisition, and all current participants exceed this threshold;

(3) Companies participating in the test program would be required to report data by North American Industrial Classification System codes, by major defense acquisition program, by military department, and by service contract exceeding \$100.0 million; and

(4) The requirements for data on the costs avoided as a result of the program would be expanded.

As with other subcontracting programs required by the Small Businesses Act, this section would stipulate that a failure of a participant to make a good-faith effort to comply with the program will be used as a factor in past performance evaluations.

Lastly, this section would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives, the

Committee on Small Business of the House of Representatives, and the Committee on Small Business and Entrepreneurship of the Senate, not later than September 20, 2015, with an assessment of the program order to inform any future decision to reauthorize the program.

#### Section 812—Improving Opportunities for Service-Disabled Veteran-Owned Small Businesses

This section would amend section 657 of title 15, United States Code, by consolidating the verification and appeals processes for Service-Disabled Veteran-Owned Small Business (SDVOSB) programs at the Department of Veterans Affairs and the Small Business Administration (SBA), and by moving the processes and resources of the SDVOSB verification programs at the Department of Veterans Affairs to the SBA. This section would also unify the definitions of SDVOSB in section 632 of title 15, United States Code, and section 8127(l) of title 38, United States Code, and would amend section 8127(f) of title 38, United States Code, to require the Secretary of Veterans Affairs to enter into a memorandum of agreement with the Administrator of the Small Business Administration specifying the manner in which the Secretary shall notify the Administrator as to an individual's status as a veteran or a veteran with a service-connected disability. These changes should allow more efficient and transparent verification of small businesses requesting SDVOSB status.

#### Section 813—Plan for Improving Data on Bundled and Consolidated Contracts

This section would amend section 644 of title 15, United States Code, by requiring the Small Business Administration to work with other agencies to create and implement a data quality improvement plan to promote greater accuracy, transparency, and accountability in the reporting of contract bundling and consolidation. The committee recognizes that properly labeling a contract as bundled or consolidated is important to small business competition, as the process of contract labeling triggers a series of reviews and mitigation steps that promote opportunities for small business. Therefore, this section would also require the Comptroller General of the United States to initiate a study, not later than October 1, 2018, to examine the effectiveness of the required data quality improvement plan and report the findings of the study to the Committee on Small Business of the House of Representatives and the Committee on Small Business and Entrepreneurship of the Senate not later than 12 months after initiation of the study.

#### Section 814—Authority to Provide Education to Small Businesses on Certain Requirements of Arms Export Control Act

This section would amend section 21(c)(1) of the Small Business Act (15 U.S.C. 648(c)(1)) by including a requirement that applicants receiving grants pursuant to that section shall also assist small businesses by providing, where appropriate, education on the requirements applicable to small businesses under the regulations issued pursuant to the Arms Export Control Act (chapter 39 of title 22, United States Code) and on compliance with those requirements. This section would also amend section 2418 of title 10, United States Code, by expanding the Procurement Technical Assistance Program to assist small business concerns with education related to export controls.

#### Section 815—Prohibition on Reverse Auctions for Covered Contracts

This section would express a sense of Congress that reverse auctions, when used appropriately, may improve the Federal Government's procurement of commercially available goods and services by increasing competition, reducing prices, and improving opportunities for small businesses. However, the committee is concerned that, if not used appropriately, reverse auctions can harm small businesses, reduce competition, and render higher purchase prices.

The committee remains concerned that the use of reverse auctions to procure services, such as design and construction services, or goods such as items of personal protective equipment and specific organizational clothing and equipment, may not serve the interests of the warfighter or the taxpayer. Therefore, this section would also amend the Small Business Act (15 U.S.C. 631) to prohibit the use of reverse auctions for procurement of certain goods and services if the contract is awarded using a Small Business Act procurement authority. It would also limit the use of reverse auctions in cases where only one offer was received or where offerors do not have the ability to submit revised bids throughout the course of the auction. The section further clarifies that the desire to use a reverse auction does not obviate Federal agencies from the obligation to use a Small Business Act procurement authority.

#### Section 816—SBA Surety Bond Guarantee

This section would amend section 411(c)(1) of the Small Business Investment Act of 1958 (Public Law 85-699) by raising the guarantee rate on the Small Business Administration's preferred security bond program from 70 percent to 90 percent. This should enable greater competition for government contracts by small business construction contractors, thereby reducing prices for the taxpayer. Data provided by the Small Business Administration to the House Committee on Small Business indicates that this change can be made at no cost to the taxpayer.

## TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

## LEGISLATIVE PROVISIONS

### SUBTITLE A—DEPARTMENT OF DEFENSE MANAGEMENT

#### Section 901—Redesignation of the Department of the Navy as the Department of the Navy and Marine Corps

This section would re-designate the Department of the Navy as the Department of the Navy and the Marine Corps and change the title of its secretary to the Secretary of the Navy and Marine Corps. This section would formally recognize the responsibility of the Office of the Secretary of the Navy over both the Navy and Marine Corps and the Marine Corps' status as an equal partner with the Navy.

#### Section 902—Additional Responsibility for Director of Operational Test and Evaluation

This section would amend section 139 of title 10, United States Code, by including a new subsection that would require the Director of Operational Test Evaluation to consider the potential for increases in program cost estimates or delays in schedule estimates in the implementation of policies, procedures, and activities related to operational test and evaluation, and to take appropriate action to ensure that the conduct of operational test and evaluation activities do not unnecessarily impede program schedules or increase program costs.

Elsewhere in this report, the committee directs the Comptroller General of the United States to conduct a review of the operational test and evaluation processes and activities of the Department of Defense and to report the results of that review to the congressional defense committees not later than March 15, 2015.

#### Section 903—Extension of Authority to Waive Reimbursement of Costs of Activities for Nongovernmental Personnel at Department of Defense Regional Centers for Security Studies

This section would amend section 941(b)(1) of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (10 U.S.C. 184) by extending for 5 years, the authority of the Secretary of Defense to waive the reimbursement of costs for certain nongovernmental personnel at the Department of Defense Regional Centers for Security Studies.

#### Section 906—Combatant Command Efficiency Plan

This section would require the Secretary of Defense to develop a plan to combine the back office functions of two or more combatant commands and to submit a report on the plan to the congressional defense committees within 120 days after the date of the enactment of this Act. This section would define the term

"back office functions" as those including, but not limited to, the administrative and support functions of a headquarters of a combatant command. This section would also limit fiscal year 2015 funds for the headquarters of the Joint Chiefs of Staff until the Secretary of Defense, in coordination with the Chairman of the Joint Chiefs Of Staff, provides the briefing on combatant command headquarters personnel and resource requirements that was directed in the committee report (H. Rept. 113-102) accompanying the National Defense Authorization Act for Fiscal Year 2014.

The committee believes a focus by the Department of Defense on consolidating or eliminating organizations and personnel that perform similar functions and missions, such as administrative and support functions, can contribute to cost savings and efficiencies within the Department.

#### Section 909—Office of Net Assessment

This section would establish the Office of Net Assessment (ONA) as a new section in chapter 4 of title 10, United States Code, that includes a requirement for the Secretary of Defense to establish a separate, dedicated program element for ONA in the annual budget materials submitted to Congress. This section would also include a statement of policy that the office be maintained as an independent organization within the Department of Defense responsible for developing and coordinating net assessments of the military capabilities and potential of the United States in comparison with the military capabilities and potential of other countries or groups of countries, so as to identify emerging or future threats or opportunities for the United States.

The committee is aware that the Secretary of Defense plans to realign ONA under the Office of the Under Secretary of Defense for Policy. While the committee supports the Secretary's objective to have ONA's long-range comparative assessments inform and influence the Department's overall strategy and policy, it remains concerned that such a realignment may ultimately impact the freedom and flexibility of the office to examine long-range challenges and non-policy specific matters that may not always be in sync with the priorities and responsibilities of the Under Secretary of Defense for Policy. Furthermore, the committee remains unconvinced that such a realignment would produce any meaningful cost savings or efficiencies that the Secretary hopes to achieve.

This section would therefore preserve the independence of the office, ensure that the head of the office reports directly to the Secretary of Defense, and create greater visibility into its budget. Elsewhere in this Act, the committee recommends an increase in funds for the office.

#### SUBTITLE B—TOTAL FORCE MANAGEMENT

##### Section 912—Repeal of Extension of Comptroller General Report on Inventory

This section would amend section 803(c) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84), as amended by section 951(b) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66), by striking “2013, 2014, and 2015” and inserting “and 2013”. The effect of this amendment would be to repeal the requirement for the Comptroller General of the United States to report on efforts by the Department of Defense to compile and review the Department's inventory of contract services within 270 days after such inventory has been submitted to Congress. While the Comptroller General's work in this area has been beneficial, the committee notes that there are other existing mandates for reviews and reporting requirements regarding how the Department's inventory of contract services is used to inform workforce and budget decisions.

## TITLE X—GENERAL PROVISIONS

### LEGISLATIVE PROVISIONS

#### SUBTITLE A—FINANCIAL MATTERS

##### Section 1001—General Transfer Authority

This section would allow the Secretary of Defense to make transfers between any amounts of authorizations for fiscal year 2015 in division A of this Act. This section would limit the total amount transferred under this authority to \$4.0 billion. This section would also require prompt notification to Congress of each transfer made.

##### Section 1002—Repeal of Limitation on Inspector General Audits of Certain Financial Statements

This section would strike subsection (d) of section 1008 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107) to permit an increase in the number of auditors available to provide independent reviews of audit practices throughout the Department of Defense, thus helping the Department streamline its efforts to ensure proper financial management. To comply with the Financial Improvement and Audit Readiness Plan to be audit ready by 2017, the Department of Defense requires a sufficient number of auditors within the Office of the Inspector General to provide independent audit reviews throughout the Department.

#### SUBTITLE B—COUNTER-DRUG ACTIVITIES

##### Section 1011—Extension of Authority to Support Unified Counterdrug and Counterterrorism Campaign in Colombia

This section would extend, by 1 year, support to the unified counterdrug and counterterrorism campaign in the Republic of Colombia originally authorized by section 1021 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), and most recently amended by section 1011 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66).

Section 1012—Three-Year Extension of Authority of Department of Defense to Provide Additional Support for Counterdrug Activities of Other Governmental Agencies

This section would extend, by 3 years, the authority of the Department of Defense to provide additional support for counter-drug activities of other governmental agencies originally authorized by section 1004 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510), and most recently amended by section 1005 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81).

Section 1013—Sense of Congress on Mexico and Central America

This section would express the sense of Congress that the Department of Defense should continue to support programs that combat illicit networking in the United Mexican States and Central America.

SUBTITLE D—COUNTERTERRORISM

Section 1032—Prohibition on Use of Funds to Construct or Modify Facilities in the United States to House Detainees Transferred from United States Naval Station, Guantanamo Bay, Cuba

This section would prohibit the Secretary of Defense from using any of the funds available to the Department of Defense during the period beginning on the date of the enactment of this Act and ending on December 31, 2015, to modify or construct any facility in the United States, its territories, or possessions to house any detainee transferred from U.S. Naval Station, Guantanamo Bay, Cuba, for the purposes of detention or imprisonment in the custody or under the effective control of the Department of Defense.

## Section 1033—Prohibition on the Use of Funds for the Transfer or Release of Individuals Detained at United States Naval Station, Guantanamo Bay, Cuba

This section would prohibit the use of any amounts authorized to be appropriated or otherwise made available to the Department of Defense to be used during the period beginning on the date of the enactment of this Act and ending on December 31, 2015, to transfer or release detainees at U.S. Naval Station, Guantanamo Bay, Cuba, to or within the United States, its territories, or possessions.

### SUBTITLE E—MISCELLANEOUS AUTHORITIES AND LIMITATIONS

#### Section 1046—Submittal of Procedures and Reports Relating to Sensitive Military Operations

This section would prohibit the obligation or expenditure of 25 percent of the funds authorized to be appropriated by this Act or otherwise available for fiscal year 2015 for the Office of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict until the congressional defense committees receive the procedures required by section 130f(b)(1) of title 10, United States Code, and the report required by section 1043 of the National Defense Authorization for Fiscal Year 2014 (Public Law 113-66).

Sections 1041 and 1043 of Public Law 113-66 are critical to the congressional defense committees' oversight of targeted lethal and capture operations conducted by the armed forces. The committee is troubled that the Department has missed the statutory deadlines for submitting these materials.

### SUBTITLE F—STUDIES AND REPORTS

#### Section 1052—Response of the Department of Defense to Compromises of Classified Information

This section would require the Secretary of Defense to submit a report to the congressional defense committees within 60 days after the date of the enactment of this Act on actions taken by the Secretary regarding significant compromises of classified information. The report shall include a description of any changes to Department of Defense policies or guidance relating to significant compromises of classified information, an overview of mitigation efforts, a description of the resources dedicated to efforts relating to such compromises, a description of the Secretary's plan to continue evaluating and mitigating any damages, and a general description and estimate of the cost associated with mitigating such compromises. This section would also require updates to the initial report on a semiannual basis during calendar years 2015-18.

### SUBTITLE G—OTHER MATTERS

## Section 1061—Technical and Clerical Amendments

This section would make a number of technical and clerical amendments of a non-substantive nature to existing law.

## Section 1063—Sale or Donation of Excess Personal Property for Border Security Activities

This section would amend section 2576a of title 10, United States Code, "Excess personal property: sale or donation for law enforcement activities" to include border security activities and consultation with the Secretary of Homeland Security when a transfer relates to the Department of Homeland Security.

The committee believes border security activities of the Department of Homeland Security should be considered alongside counterdrug and counterterrorism activities when determining the sale or donation of excess personal property for law enforcement activities.

## Section 1067—Resubmission of 2014 Quadrennial Defense Review

This section would require the Secretary of Defense, in consultation with the Chairman of the Joint Chiefs of Staff, to resubmit a report on the Quadrennial Defense Review (QDR) 2014 that was submitted, as required by section 118(d) of title 10, United States Code, to the Committees on Armed Services of the Senate and the House of Representatives not later than October 1, 2014.

In the resubmitted report, the Secretary would be required to include: an articulation of a defense program for the next 20 years; an identification of the budget plan that would be required to provide sufficient resources to execute successfully the full range of missions called for in that national defense strategy at a low-to-moderate level of risk, and any additional resources required to achieve such a level of risk; and recommendations that are not constrained to comply with and are fully independent of the budget submitted to Congress by the President pursuant to section 1105 of title 31, United States Code. This section would limit authorized fiscal year 2015 funds for the Office of the Under Secretary of Defense for Policy until the report is resubmitted to Congress.

While the committee appreciates the work that went into the 2014 QDR, it remains concerned that these reviews have grown less compliant with the law and strayed further from the intent of Congress. The committee believes the QDR should provide a mechanism for setting the priorities of the Department of Defense, shaping the force, guiding capabilities and resources, and adjusting the organization to respond to changes in the strategic environment. In addition, it should assist Congress in better understanding the relationships and tradeoffs between missions, risks, and resources, particularly in light of geopolitical changes and domestic developments in the last few years.

The committee believes the 2014 QDR missed a major opportunity to bring together key national security stakeholders and strategic thinkers in the

Department to reshape the longer-term direction of the Nation's forces, their missions and capabilities, and needed resources. Instead, inconsistent with the QDR review and report requirements in sections 118(a) and (b) of title 10, United States Code, the 2014 QDR focused largely on the planned force structure associated with the 5 year Future Years Defense Program, and it contained a strategy that assumes increased risk to the force, without specifying the resources required to execute the strategy at a low-to-moderate level of risk.

The committee believes that much of the information to be included in the re-submitted report was produced over the course of the review and could be provided to the committee in a reasonable amount of time.

## TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

### LEGISLATIVE PROVISIONS

#### SUBTITLE A—ASSISTANCE AND TRAINING

##### Section 1201—One-Year Extension of Global Security Contingency Fund

This section would authorize a 1 year extension of the Global Security Contingency Fund (GSCF).

The committee remains concerned about the progress of the GSCF, as previously stated in the committee report (H. Rept. 113-102) accompanying the National Defense Authorization Act for Fiscal Year 2014 and the committee report (H. Rept. 112-479) accompanying the National Defense Authorization Act for Fiscal Year 2013. The committee believes that if the Department of Defense and the Department of State cannot successfully establish full operational capability for the GSCF, including planning, executing, and assessing GSCF activities, then it may consider not renewing this authority in future years.

Elsewhere in this report, the committee recommends no dedicated funding for GSCF; rather, the committee believes projects contemplated under GSCF should compete within other security assistance priorities for funds otherwise available to the Department as they have been.

##### Section 1202—Notice to Congress on Certain Assistance Under Authority to Conduct Activities to Enhance the Capability of Foreign Countries to Respond to Incidents Involving Weapons of Mass Destruction

This section would amend section 1204 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) by adding the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives to the notification requirement.

### Section 1203—Enhanced Authority for Provision of Support to Foreign Military Liaison Officers of Foreign Countries While Assigned to the Department of Defense

This section would amend section 1051a of title 10, United States Code, to authorize the Secretary of Defense to provide administrative and support services, to include certain training programs, for liaison officers of a foreign country, while such liaison officers are assigned temporarily to the headquarters of a combatant command, component command, or subordinate operational command of the United States. This section would further amend section 1051a of title 10, United States Code, to include a limitation on the authorized number of liaison officers and amount of unreimbursed support for travel, subsistence, and medical care expenses per fiscal year for any such liaison officer. This section would also require the Secretary of Defense to submit to the congressional defense committees an annual report on January 31 of each year from 2016-18 on the summary of expenses incurred by the United States for liaison officers of a developing country, and include the Department of Defense's definition of a "developing country" as used for the purposes of this authority.

The committee recognizes the role of foreign liaison officers at the combatant commands and component commands to provide expertise to the commander and staff to better understand the respective region and plan for contingencies in the command's area of responsibility. Although the committee recognizes foreign liaison officers are present at all commands, section 1051a of title 10, United States Code, provides specific authority to the Secretary of Defense to provide administrative and financial support to those liaison officers of a developing country involved in a current U.S. military operation. The committee believes the commands should continue to benefit from the unique contributions of the liaison officers beyond current military operations, such as Operation Enduring Freedom.

### Section 1204—Annual Report on Human Rights Vetting and Verification Procedures of the Department of Defense

This section would require the Secretary of Defense, in consultation with the Secretary of State, to submit to Congress an annual report on human rights vetting and verification procedures of the Department of Defense. This report shall be submitted at the same time as the budget of the President is submitted to Congress under section 1105 of title 31, United States Code.

### SUBTITLE B—MATTERS RELATING TO AFGHANISTAN AND PAKISTAN

### Section 1211—Extension of Commanders' Emergency Response Program in Afghanistan

This section would amend section 1201 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), as most recently amended by section 1211 of the National Defense Authorization Act for Fiscal Year

2014 (Public Law 113-66), by extending for 1 year the Commanders' Emergency Response Program in the Islamic Republic of Afghanistan.

#### Section 1212—Extension of Authority for Reimbursement of Certain Coalition Nations for Support Provided to United States Military Operations

This section would amend section 1233 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as most recently amended by section 1213 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66), by extending the authority for reimbursement of coalition nations for support provided to the United States for military operations through fiscal year 2015, and making certain technical amendments.

Additionally, this section would prohibit the reimbursement of support provided by the Government of the Islamic Republic of Pakistan until such time as the Secretary of Defense certifies to the congressional defense committees that Pakistan is maintaining security and is not, through its actions or inaction at any level of government, limiting or otherwise restricting the movement of U.S. equipment and supplies along the Ground Lines of Communication through Pakistan, and that Pakistan is taking demonstrable steps to: (1) support counterterrorism operations against Al Qaeda, Tehrik-i-Taliban Pakistan, and other militant groups such as the Haqqani Network and the Quetta Shura Taliban; (2) disrupt the conduct of cross-border attacks against U.S., coalition, and Afghan security forces; (3) counter the threat of improvised explosive device networks; and (4) conduct cross-border coordination and communication with Afghan security forces and U.S. Armed Forces.

#### Section 1213—Extension of Certain Authorities for Support of Foreign Forces Supporting or Participating with the United States Armed Forces

This section would amend section 1234 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) and section 1202(e) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364), as most recently amended by sections 1217(a) and 1217(b) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66), respectively. Specifically, it would extend the authority to (1) provide supplies, services, transportation (including airlift and sealift), and other logistical support to coalition forces supporting United States military and stabilization operations in the Islamic Republic of Afghanistan; and (2) use acquisition and cross-servicing agreements to lend military equipment to the military forces of a nation participating in combined operations with the United States in Afghanistan.

The committee recognizes that the United States may be involved in a combined operation with partner nations in Afghanistan as part of Operation Resolute Support, following the end of the North Atlantic Treaty Organization mission in Afghanistan on December 31, 2014. Should the President decide to commit the United States to a post-2014 presence and mission as part of Operation

Resolute Support, such partner nations would require logistical support and the lending of military equipment from U.S. forces in Afghanistan to effectively execute the Operation Resolute Support mission.

#### Section 1214—Report on Progress Toward Security and Stability in Afghanistan under Operation Resolute Support

This section would create a new "Report on Progress Toward Security and Stability in Afghanistan." It would include reporting requirements similar to those originally contained in section 1230 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as most recently amended by section 1218 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), but updated to reflect the post-2014 North Atlantic Treaty Organization (NATO) effort in the Islamic Republic of Afghanistan known as Operation Resolute Support.

In addition, this section would require the Secretary of Defense, in coordination with the Secretary of State, to submit such report to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives not later than April 1, 2015, and every 180 days thereafter, on the progress toward security and stability in Afghanistan under Operation Resolute Support.

Lastly, this section would extend the original "Report on Progress Toward Security and Stability in Afghanistan" for 3 months and sunset it on December 31, 2014.

#### Section 1215—Requirement to Withhold Department of Defense Assistance to Afghanistan in Amount Equivalent to 150 Percent of All Taxes Assessed by Afghanistan to Extent Such Taxes are not Reimbursed by Afghanistan

This section would require the Department of Defense to withhold fiscal year 2015 funds appropriated for assistance to the Government of the Islamic Republic of Afghanistan in the amount equivalent to 150 percent of the total taxes assessed during fiscal year 2014 by Afghanistan on such assistance. This withhold would continue to the extent that the Secretary of Defense certifies that Afghanistan has not provided a reimbursement for those taxes to the Department, or relevant Department contractors and subcontractors. The Secretary of Defense may waive such requirement if it is necessary to achieve U.S. goals in Afghanistan.

Additionally, this section would require the Secretary of Defense to submit a report, not later than March 1, 2015, to the Committees on Armed Services of the Senate and the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives, on the total taxes assessed during fiscal year 2014 by the Government of Afghanistan on any Department of Defense assistance.

Lastly, this section would terminate once the Secretary of Defense notifies the appropriate committees that the United States and Afghanistan have signed a bilateral security agreement and that such agreement has entered into force.

The committee notes that such taxation by Afghanistan on Department of Defense assistance is a violation of the status of forces agreement (SOFA) between the United States and Afghanistan. The committee expects the Government of Afghanistan to adhere to this SOFA and not levy illegitimate taxes and penalties on Department of Defense contractors and subcontractors providing services in Afghanistan.

#### Section 1216—United States Plan for Sustaining the Afghanistan National Security Forces Through the End of Fiscal Year 2018

This section would require the Secretary of Defense, in consultation with the Secretary of State, to submit a report within 90 days after the date of the enactment of this Act to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives, that contains a detailed plan for sustaining the Afghanistan National Security Forces (ANSF) through the end of fiscal year 2018, consistent with plans that are being considered by the North Atlantic Treaty Organization. The objective of such plan is to ensure that the ANSF will be able to independently and effectively conduct operations and maintain security and stability in the Islamic Republic of Afghanistan.

#### Section 1217—Sense of Congress on United States Military Commitment to Operation Resolute Support in Afghanistan

This section would express the sense of Congress on the United States military commitment to Operation Resolute Support in the Islamic Republic of Afghanistan to include: the importance of maintaining a U.S. residual presence in Afghanistan for Operation Resolute Support beginning on January 1, 2015; the importance of achieving a signed Bilateral Security Agreement, and a status of forces agreement to support the North Atlantic Treaty Organization (NATO) mission; and, continuing to financially support the Afghanistan National Security Forces (ANSF) due to the vital interests that the United States continues to have in Afghanistan.

The committee applauds the gains achieved by the United States, NATO, and its coalition partners in Afghanistan, to include:

(1) The International Security and Assistance Force has trained and is building the ANSF, including doubling the ANSF in size between 2009-14, to its current end strength of approximately 352,000 personnel;

(2) The ANSF currently executes 95 percent of its conventional operations and 98 percent of its special operations missions across Afghanistan;

(3) The United States signed a Strategic Partnership Agreement with the Government of Afghanistan and has designated Afghanistan as a major non-NATO ally;

(4) Life expectancy in Afghanistan has increased from 37 years of age in 2000 to 56 years of age in 2014;

(5) 65 percent of the Afghan population has access to the Internet;

(6) There are four times more healthcare facilities in Afghanistan in 2014 than in 2003;

(7) More than 10,000,000 children are attending school, including 3,000,000 girls, in Afghanistan;

(8) There are more than 13,000 general education schools in Afghanistan; and

(9) Paved roads have increased from just 32 miles in 2002 to 7,500 miles in 2014.

The committee notes that the term Operation Resolute Support refers to the NATO mission in Afghanistan beginning on January 1, 2015.

#### Section 1218—Extension of Afghan Special Immigrant Program

This section would authorize 1,000 visas for principal aliens who may be provided special immigrant visa status in accordance with section 602(b)(3) of the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101). This section would also extend the period in which the principal alien must be employed by or on behalf of the U.S. Government in the Islamic Republic of Afghanistan to December 31, 2015. Additionally, this section would extend the period in which the principal alien must apply to the Chief of Mission in Afghanistan to September 30, 2015. The authorization in this section would terminate on September 30, 2016.

#### SUBTITLE C—MATTERS RELATING TO THE RUSSIAN FEDERATION

#### Section 1221—Limitation on Military Contact and Cooperation between the United States and the Russian Federation

This section would prohibit the use of funds for fiscal year 2015 for bilateral military-to-military contact or cooperation between the United States and the Russian Federation until the Secretary of Defense, in consultation with the Secretary of State, certifies to the appropriate congressional committees that Russia is respecting the sovereignty of Ukrainian territory, no longer acting inconsistently with the Intermediate-range Nuclear Forces Treaty, and in compliance with the Treaty on Conventional Armed Forces in Europe. This section would include a waiver for the Secretary of Defense, pending a notification, in coordination with the Secretary of State, to the appropriate congressional committees that such contact or cooperation is in the national security interest of the United States and a period of 30 days has elapsed following the notification.

The committee notes that at the time this report was filed, the Secretary of Defense has suspended military exercises, bilateral meetings, port visits, and planning conferences between the Armed Forces of the United States and Russia in response to ongoing Russian aggression towards Ukraine. The committee believes that U.S.-Russia military contact and cooperation must remain suspended so long as Russia continues its aggression towards Ukraine and continues to take actions inconsistent with its treaty obligations.

#### Section 1225—Report on Non-Compliance by the Russian Federation of its Obligations under the INF Treaty

This section would express the sense of Congress regarding the material breach of the Intermediate-Range Nuclear Forces Treaty by the Russian Federation, and would require the President to report not later than 90 days after the date of the enactment of this Act, and every 90 days thereafter, on efforts to have Russia return to being in compliance with the treaty, and the President's assessment as to whether it remains in the national security interest of the United States to remain a party to the treaty.

#### Section 1226—Sense of Congress Regarding Russian Aggression Toward Ukraine

This section would express the sense of Congress regarding Russian aggression towards Ukraine.

Elsewhere in this report, the committee notes with concern the recent actions undertaken by the Government of the Russian Federation in Ukraine. The committee believes both the overt and covert actions taken by the Russian military and Government to seize and annex Crimea, destabilize eastern Ukraine, and threaten further military action against the Government of Ukraine, are clearly meant to coerce the Government and people of Ukraine into adopting policies and an orientation centered on Russia and away from Europe and the West.

### SUBTITLE D—OTHER MATTERS

#### Section 1233—Modification of National Security Planning Guidance to Deny Safe Havens to Al-Qaeda and its Violent Extremist Affiliates

This section would modify section 1032 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) by requiring the President to provide to the Committees on Armed Services of the Senate and the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives, the required national security planning guidance, including any updates to such guidance, to deny safe havens to Al Qaeda and its violent extremist affiliates not later than October 1, 2014. Additionally, this section would add an element to the required guidance that would describe the feasibility, resourcing, authorities required, and

potential benefit of conducting multilateral training and equipping of military forces in relevant countries.

The committee remains concerned about the worldwide evolution and growth of Al Qaeda, its affiliates, and associated groups, as noted by non-U.S. Government experts at a February 2014 committee hearing. Al Qaeda has been able to evolve and grow largely due to safe havens in certain locations such as the Syrian Arab Republic, the Republic of Iraq, and Libya, to name a few.

While section 1032 of Public Law 112-81 required the President to issue national security planning guidance to deny safe havens to Al Qaeda and its violent extremist affiliates, it did not require the submission of such guidance to the relevant congressional committees. However, the conference report (H. Rept. 112-329) accompanying the National Defense Authorization Act for Fiscal Year 2012 requested that the conferees be briefed on the guidance issued by the President. The committee notes that such briefing was not provided.

#### Section 1234—Strategic Framework for United States Security Force Assistance and Cooperation in the European and Eurasian Regions

This section would require the Secretary of Defense, in coordination with the Secretary of State, to develop a strategic framework for security force assistance and cooperation in Europe and Eurasia. This section would also require the Secretary of Defense, in coordination with the Secretary of State, to submit a report on the strategic framework within 120 days after the date of the enactment of this Act to the Committees on Armed Services of the Senate and the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives.

The committee believes that a comprehensive strategic framework for security force assistance is important for building and maintaining the partner capacity of European and Eurasian forces. The committee recognizes and values the interoperability and combat gains made by European and Eurasian allied and partner forces, earned as a result of the North Atlantic Treaty Organization (NATO) International Security Assistance Force (ISAF) mission in the Islamic Republic of Afghanistan, and it does not want to see these gains lost after the ISAF mission ends in December 2014. The committee believes the strategic framework should focus on those nations for which the Department of Defense has leveraged its building partnership capacity authorities, to include the Global Train and Equip, Warsaw Initiative Fund, and Global Security Contingency Fund authorities.

#### Section 1235—Report on "New Normal" and General Mission Requirements of United States Africa Command

This section would express a sense of Congress on the force structure and force posture of AFRICOM within the context of "New Normal" and its general mission requirements.

Following the terrorist attack against U.S. facilities in Benghazi, Libya, on September 11, 2012, the U.S. Government established a "New Normal" set of requirements and associated resourcing worldwide. The committee is aware that with the current force posture and structure of the U.S. Africa Command (AFRICOM), the United States is accepting a high level of risk in defending U.S. posts that have been determined to be "high risk, high threat" as part of the "New Normal" requirements. Moreover, the committee is concerned that AFRICOM does not have sufficient assigned military forces; intelligence, surveillance, and reconnaissance assets; crisis response forces; and enablers to meet the "New Normal" requirements.

Additionally, this section would require the Secretary of Defense, in consultation with the Secretary of State and the Chairman of the Joint Chiefs of Staff, to submit a report to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives not later than January 15, 2015, on how the "New Normal" has changed AFRICOM's force posture and force structure requirements. The committee expects the report to include inputs and views from the Commander, U.S. Africa Command.

#### Section 1237—Enhanced Authority to Acquire Goods and Services of Djibouti in Support of Department of Defense Activities in United States Africa Command Area of Responsibility

This section would provide the Secretary of Defense with an enhanced authority to acquire products and services produced in the Republic of Djibouti in support of Department of Defense activities in the U.S. Africa Command (AFRICOM) area of responsibility. The Secretary would be required to make a determination that: (1) the product or service is to be used only in support of Department activities in AFRICOM; (2) the limit on competition or preference for Djiboutian products or services is vital to the national security interest of the United States; (3) the Djiboutian product or service is of equivalent quality to that which would have been otherwise acquired; and (4) the limitation or preference will not adversely affect U.S. military or stability operations in AFRICOM or the U.S. industrial base. The authority provided in this section would terminate on September 30, 2018.

This section would also require the Secretary of Defense to ensure that such procurement of Djiboutian products or services is conducted in accordance with Department of Defense management structure requirements in section 2330(a) of title 10, United States Code, and identified and reported under a single, joint Department of Defense-wide system for the management and accountability of contractors operating overseas. It would also require the Secretary to ensure that AFRICOM has sufficiently trained staff and resources to conduct oversight of such procurement activities in order to detect and deter fraud, waste, and abuse.

Additionally, this section would express the sense of Congress that U.S. forces should remain forward postured in Africa and the Middle East; that Djibouti is strategically located to support U.S. vital national security interests; that the United States should take definitive steps to maintain its basing access and agreements with the Government of Djibouti; that the United States should devise and implement a comprehensive approach to reinforce the strategic partnership with the Government of Djibouti; and that the Secretary of State, the Administrator for the United States Agency for International Development, and the Secretary of Defense should take concrete steps to advance and strengthen the relationship between the United States and the Government of Djibouti.

The committee believes that this is an exceptional situation and recommends this authority because it recognizes that the U.S. military basing in Djibouti provides unique strategic positioning and access to the region, which has and continues to support vital U.S. national security interests. Additional detail on the criticality of U.S. basing in Djibouti is contained in the classified annex to this report. The committee believes that the United States must take proactive steps to reinforce a long-term, strategic relationship with the Government of Djibouti in order to support such vital national security interests. Elsewhere in this report, the committee directs the Secretary of Defense, in coordination with the Secretary of State, to submit a report to certain committees outlining the specific steps that the Department of State is taking to strengthen its strategic relationship with Djibouti.

#### Section 1238—Report on Goals and Objectives Guiding Military Engagement with Burma

This section would require the Secretary of Defense, in coordination with the Secretary of State, to submit to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives, not later than December 1, 2014, a report on the goals and objectives guiding military-to-military engagement between the United States and the Union of Burma.

The committee welcomes the commitment to reform made by the Government of Burma. However, the committee notes that the Government of Burma needs to progress in: protecting the individual freedoms and human rights of the Burmese people, including for all ethnic and religious minorities and internally displaced populations; establishing civilian control of the armed forces; severing military-to-military ties with the Democratic People's Republic of Korea; implementing constitutional and electoral reforms; and implementing mechanisms for increased governmental transparency and accountability.

The committee recognizes the role that the U.S. military can play in improving the Burmese military's understanding of human rights, the rule of law, and civilian control of the military. The committee encourages the Department of Defense and the Department of State to communicate the relationship between

U.S.-Burma military-to-military engagement and reform efforts undertaken by the Government of Burma.

#### Section 1239—Sense of Congress on United States Presence and Cooperation in the Arabian Gulf Region to Deter Iran

This section would express the sense of Congress on the U.S. forward presence and cooperation in the region of the Arabian Gulf in order to deter the Islamic Republic of Iran. Elements of this section would include statements that the United States should: maintain a robust forward presence and posture in the Arabian Gulf; seek ways to support the security posture of Gulf Cooperation Council (GCC) countries and the State of Israel; move funding of key strategic bases in the Arabian Gulf region into the Department of Defense's base budget; and seek to complete status of forces and defense agreements with GCC countries to support the defense of the Arabian Gulf.

Furthermore, this section would also state that any comprehensive agreement with Iran regarding its nuclear program should address the possible military dimensions of such program. Finally, the sense of Congress would state that the United States should continue to put pressure on Iran's network of organizations that conduct malign activities, and the U.S. Government should not enter into a contract with any person or entity that has violated U.S. sanctions laws with respect to contracting with the Government of Iran.

### TITLE XIII—COOPERATIVE THREAT REDUCTION

#### LEGISLATIVE PROVISIONS

##### Section 1301—Specification of Cooperative Threat Reduction Programs and Funds

This section would define the programs and funds that are Cooperative Threat Reduction (CTR) programs and funds as those authorized to be appropriated in section 301 of this Act, and specify that CTR funds shall remain available for obligation for 3 fiscal years.

##### Section 1302—Funding Allocations

This section would allocate specific amounts for each program under the Department of Defense Cooperative Threat Reduction (CTR) program from within the overall \$365.1 million that the committee would authorize for the CTR program. The allocation under this section reflects the amount of the budget request for fiscal year 2015. This section would also require notifications to Congress 15 days before the Secretary of Defense obligates and expends fiscal year 2015 funds for purposes other than those specifically authorized. In addition, this section would provide

limited authority to obligate amounts for a program element under the CTR program in excess of the amount specifically authorized for that purpose.

## TITLE XIV—OTHER AUTHORIZATIONS

#### SUBTITLE B—NATIONAL DEFENSE STOCKPILE

##### Section 1411—Revisions To Previously Authorized Disposals From The National Defense Stockpile

This section would authorize revisions on limitations in asset sales contained in section 3303(a)(7) of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261), as most recently amended by section 1412(a) of the Duncan Hunter National Defense Authorization

The notification would include an identification of the change, a national security rationale for the change, the impact of the change on the EELV block buy contract, the impact of the change on the opportunities for competition for certified EELV launch providers, and the costs or savings of the change. The notification requirement would apply to fiscal years 2015, 2016, and 2017.

### Section 1603—Satellite Communications Responsibilities of Executive Agent for Space

This section would direct the Secretary of Defense to revise Department of Defense directives and guidance for the Department of Defense Executive Agent (EA) for Space, with respect to the development of space strategies, architectures and programs for satellite communications. This section would require the EA to conduct strategic planning to ensure these strategies align with Department requirements. In addition, it would require the EA to coordinate with the necessary offices within the Department of Defense in order to eliminate duplication of efforts, maximize the effectiveness of efforts, and to optimize acquisition effectiveness and efficiency for military and commercial satellite communications. Finally, this section would direct the EA to coordinate with the Chairman of the Joint Requirements Oversight Council to develop a process to identify current and projected satellite communications requirements for the Department.

#### Section 1605—Pilot Program for Acquisition of Commercial Satellite Communication Services

This section would allow the Secretary of Defense to develop and execute a pilot program to examine the feasibility of expanding the use of working capital funds to acquire commercial satellite communications services to meet Department of Defense requirements. This program would terminate on October 1, 2020. In addition, this section would limit the use of any funds authorized for the Department's acquisition of commercial satellite communications services to not more than \$50.0 million per year for the pilot program execution, and only for fiscal years 2015-20. This section would also limit the authorities of the Secretary of Defense in the execution of the pilot program by prohibiting the use of the authorities granted in sections 2208(k) and 2210(b) of title 10, United States Code. Finally, this section would define goals for the execution of the pilot program, as well as reporting requirements for the program. #### Section 1616—Prohibition on National Intelligence Program Consolidation

This section would prohibit the Secretary of Defense from using any of the funds authorized to be appropriated or otherwise made available to the Department of Defense to be used during the period beginning on the date of the enactment of this Act and ending on December 31, 2015, to execute: the separation of the portion of the Department of Defense budget designated as part of the National Intelligence Program from the rest of the Department of Defense budget; the consolidation of the portion of the Department of Defense budget designated as part of the National Intelligence Program within the Department of Defense budget; or the establishment of a new appropriations account or appropriations account structure for such funds.

This section would require the Secretary of the Energy to convey two parcels of real property to the Community Reuse Organization of the Hanford Site for fair market value by December 31, 2014. The Secretary of the Energy may convey the property below fair market value if the Community Reuse Organization agrees to provide the net proceeds from the sale or lease of the real property during a seven year period to support economic redevelopment at the Hanford Site, Washington.

**DIVISION C—DEPARTMENT OF ENERGY NATIONAL  
SECURITY AUTHORIZATIONS AND OTHER  
AUTHORIZATIONS**

**TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY  
PROGRAMS**

**LEGISLATIVE PROVISIONS**

**SUBTITLE A—NATIONAL SECURITY PROGRAM AUTHORIZATIONS**

Section 3101—National Nuclear Security Administration

This section would authorize appropriations for the National Nuclear Security Administration for fiscal year 2015, including funds for weapons activities, defense nuclear nonproliferation programs, naval reactor programs, and Federal Salaries and Expenses (formerly known as the Office of the Administrator), at the levels identified in section 4701 of division D of this Act. This section would also authorize several new plant projects for the National Nuclear Security Administration.

Section 3102—Defense Environmental Cleanup

This section would authorize appropriations for defense environmental cleanup activities for fiscal year 2015, at the levels identified in section 4701 of division D of this Act. This section would also authorize several new plant projects for defense environmental cleanup.

#### Section 3104—Energy Security and Assurance

This section would authorize appropriations for energy security and assurance programs for fiscal year 2015, at the levels identified in section 4701 of division D of this Act.

### SUBTITLE B—PROGRAM AUTHORIZATIONS, RESTRICTIONS, AND LIMITATIONS

#### Section 3118—Disposition of Weapons-Usable Plutonium

This section would require the Secretary of Energy to specifically carry out construction and program support activities with fiscal year 2015 funds authorized for the Mixed Oxide Fuel Fabrication Facility (MFFF) for construction and program support activities. Program support activities are defined as those activities in support of the design, long-lead equipment, procurement, and site preparation for the MFFF.

If the Secretary of Energy determines that fiscal year 2015 funds for construction and program support activities associated with MFFF should be used for a purpose other than construction and program support activities for MFFF, the Secretary may utilize reprogramming guidance in accordance with established procedures provided to the Department of Energy defense-related program in section 4702 of the Atomic Energy Defense Act (50 U.S.C. 2742).

This section would also require the Secretary to enter into a contract with a federally funded research and development center (FFRDC) not later than 30 days after the date of the enactment of this Act to conduct a study to assess and validate the Department of Energy's analysis of options for the disposition of surplus weapons-grade plutonium. The Secretary shall then submit a report to the congressional defense committees not later than 270 days after the date of the enactment of this Act. The report shall include the FFRDC assessment, as well as the Department's identification and discussion of the life-cycle cost analyses, and explanation of how the alternatives conform with the Plutonium Management and Disposition Agreement between the Governments of the United States and the Russian Federation.

Elsewhere in this report, the committee recommends \$316.0 million, an increase of \$120.0 million, for construction and program support activities of the MFFF.

#### Section 3121—Limitation on Availability of Funds for Non-Proliferation Activities Between the United States and the Russian Federation

This section would prohibit the use of fiscal year 2015 funds for the National Nuclear Security Administration for any contact, cooperation, or transfer of technology between the United States and the Russian Federation until the Secretary of Energy, in consultation with the Secretary of State and Secretary of Defense, certifies to the appropriate congressional committees that the Russian Federation is respecting the sovereignty of Ukrainian territory, no longer acting inconsistently with the Intermediate-range Nuclear Forces Treaty, and in compliance with the Treaty on Conventional Armed Forces in Europe. The section would include a waiver for the Secretary of Energy, pending a notification, in coordination with the Secretary of State and Secretary of Defense, to the appropriate congressional committees that such contact, cooperation, or technology transfer is in the national interests of the United States and a period of 30 days has elapsed following the notification.

The committee notes that at the time that this report was filed, in response to ongoing Russian aggression toward Ukraine, the Secretary of Energy has suspended nuclear security cooperation. Similar to the position the committee has stated elsewhere in this report, the committee believes that U.S.-Russia nuclear security cooperation must remain suspended so long as Russia continues its aggression toward Ukraine and continues to take actions inconsistent with its treaty obligations.

## **TITLE XXXV—MARITIME ADMINISTRATION**

### **LEGISLATIVE PROVISIONS**

#### **Section 3502—Special Rule for DD-17**

This section would limit the application of section 55102 of title 46, United States Code to Drydock-17 (formerly known as USN-YFD-17) in the waters of the State of Alabama.

Consistent with the previously expressed views of the committee, this section would also require that a decision by an Agency Head to commit, obligate, or expend funds to a specific entity on the basis of such funding tables be based on merit-based selection procedures in accordance with the requirements of section 2304(k) and section 2374 of title 10, United States Code, and other applicable provisions of law.

12 (1) A list of enduring mission requirements,  
13 equipping, training, sustainment, and other oper-  
14 ation and maintenance activities of the military de-

1 **SEC. 352 [Log 53978]. SENSE OF CONGRESS ON ACCESS TO**  
2 **TRAINING RANGES WITHIN UNITED STATES**  
3 **PACIFIC COMMAND AREA OF RESPONSIBILITY.**  
4 **BILITY.**

5 (a) FINDINGS.—Congress makes the following find-  
6 ings:

7 (1) Reliable access to military training ranges is  
8 an essential component of military readiness.

9 (2) The training opportunities provided by mili-  
10 tary training ranges are critical to maintaining the  
11 technical and operational superiority of the Armed  
12 Forces.

13 (3) The 2014 Quadrennial Defense Review  
14 states that the operational readiness of the Armed  
15 Forces hinges on unimpeded access to land, air, and  
16 sea training and test space.

17 (4) The 2014 Quadrennial Defense Review  
18 states that United States forces in the Asia-Pacific  
19 region “will resume regular bilateral and multilateral  
20 training exercises, pursue increased training oppor-  
21 tunities to improve capabilities and capacity of part-  
22 ner nations, as well as support humanitarian, dis-  
23 aster relief, counterterrorism, and other operations  
24 that contribute to the stability of the region”.

25 (5) A number of critical military training  
26 ranges, including the Pohakuloa Training Center in

1 Hawaii, are located within the United States Pacific  
2 Command area of responsibility providing units from  
3 all the military services, as well as allied and partner  
4 militaries with realistic joint and combined arms  
5 training opportunities.

6 (6) Due to the “tyranny of distance” in the  
7 Asia-Pacific region, there are significant challenges  
8 in transporting equipment and personnel to the var-  
9 ious military training ranges within the United  
10 States Pacific Command area of responsibility.

11 (7) The Department of Defense continues a  
12 number of efforts aimed at preserving military train-  
13 ing ranges, while also minimizing the environmental  
14 effects of training activities.

15 (8) The Department of Defense has a variety of  
16 authorities that may be used to mitigate encroach-  
17 ment on military testing and training missions.

18 (b) SENSE OF CONGRESS.—In light of the findings  
19 specified in subsection (a), it is the sense of Congress that  
20 the Secretary of Defense should—

21 (1) ensure that members of the Armed Forces  
22 continue to have reliable access to military training  
23 ranges;

24 (2) optimize the use of multilateral, joint train-  
25 ing facilities overseas in order to increase readiness

1 and interoperability with allies and partners of the  
2 United States;

3 (3) utilize a full range of assets, including both  
4 air- and sea-based asset, including inactive Joint  
5 High Speed Vessels, to improve accessibility to mili-  
6 tary training areas within the United States Pacific  
7 Command area of responsibility;

8 (4) provide stable budget authority for long-  
9 term investments in range and test center infra-  
10 structure to lower the cost of access to the ranges  
11 and training centers;

12 (5) take appropriate action to identify and le-  
13 verage existing authorities and programs, as well as  
14 work with State and municipalities to leverage their  
15 authorities, to mitigate encroachment or other chal-  
16 lenges that have the potential to impact future ac-  
17 cess or operations on military training ranges;

18 (6) maximize the use of the United States Pa-  
19 cific Command training ranges, including Pohakuloa  
20 Training Center in Hawaii, by the military depart-  
21 ments and increase the use of such training ranges  
22 for bilateral and multilateral exercises with regional  
23 allies and partners; and

24 (7) take appropriate action to leverage existing  
25 authorities and programs, as well as work with local

1 governments to leverage their authorities, to address  
2 any challenges that have the potential to impede fu-  
3 ture access to or operations on military training  
4 ranges.

7 section (b) of section 1044e of title 10, United States  
8 Code, is amended—

9 (1) by redesignating paragraphs (6), (7), (8),  
10 and (9) as paragraphs (7), (8), (9), and (10), re-  
11 spectively; and

12 (2) by inserting after paragraph (5) the fol-  
13 lowing new paragraph (6):

14 “(6) Legal consultation regarding the advan-  
15 tages and disadvantages of prosecution of the al-  
16 leged sex-related offense by court-martial or by a ci-  
17 vilian court with jurisdiction over the offense before  
18 the victim expresses a preference as to the prosecu-  
19 tion authority pursuant to the process required by  
20 subsection (e)(3).”.

21 (b) PROCESS TO DISCERN VICTIM PREFERENCE.—  
22 Subsection (e) of such section is amended by adding at  
23 the end the following new paragraph:

24 “(3) The Secretary concerned shall establish a proc-  
25 ess to ensure consultation with a victim of an alleged sex-  
26 related offense that occurs in the United States to discern

1 the victim's preference regarding prosecution authority,  
2 regardless of whether the report of that offense is re-  
3 stricted or unrestricted.”.

2 **OF EVIDENCE RELATING TO ADMISSIBILITY**  
3 **OF GENERAL MILITARY CHARACTER TOWARD**  
4 **PROBABILITY OF INNOCENCE.**

5 The Secretary of Defense shall modify the Military  
6 Rules of Evidence to clarify that the general military char-  
7 acter of an accused is not admissible for the purpose of

5 (a) CONFIDENTIAL APPEAL PROCESS THROUGH  
6 BOARDS FOR CORRECTION OF MILITARY RECORDS.—The  
7 Secretaries of the military departments shall each estab-  
8 lish a confidential process by which an individual who was  
9 the victim of a sex-related offense during service in the  
10 Armed Forces may appeal, through boards for the correc-  
11 tion of military records of the military department con-  
12 cerned, the terms or characterization of the discharge or  
13 separation of the individual from the Armed Forces on the  
14 grounds that the terms or characterization were adversely  
15 affected by the individual being the victim of such an of-  
16 fense.

17 (b) CONSIDERATION OF INDIVIDUAL EXPERIENCES  
18 IN CONNECTION WITH OFFENSES.—In deciding whether  
19 to modify the terms or characterization of an individual's  
20 discharge or separation pursuant to the process required  
21 by subsection (a), the Secretary of the military department  
22 concerned shall instruct boards for the correction of mili-  
23 tary records to give due consideration to—

24 (1) the psychological and physical aspects of the  
25 individual's experience in connection with the sex-re-

1 **SEC. 1013 [Log 53304]. SENSE OF CONGRESS ON MEXICO**  
2 **AND CENTRAL AMERICA.**

3 (a) FINDINGS.—Congress makes the following find-  
4 ings:

5 (1) The stability and security of Mexico and the  
6 nations of Central America have a direct impact on  
7 the stability and security of the United States.

8 (2) Over the past decade, a “balloon effect” has  
9 pushed increased violence and instability into Cen-  
10 tral America and Mexico from South America.

11 (3) Drug cartels and transnational criminal or-  
12 ganizations have spread throughout the region, caus-  
13 ing instability and lack of rule of law in many na-  
14 tions.

15 (4) Illicit networks are used in a variety of ille-  
16 gal activities including the movement of narcotics,  
17 humans, weapons, and money.

18 (5) According to the United Nations Office on  
19 Drugs and Crime, Honduras has the highest murder  
20 rate in the world with 92 murders per 100,000 peo-  
21 ple.

22 (6) Currently, Mexico is working to reduce vio-  
23 lence created by transnational criminal organizations  
24 and address issues spurred by the emergence of in-  
25 ternal self defense groups.

1           (7) United States Northern Command and  
2           United States Southern Command lead the efforts of  
3           the Department of Defense in combating illicit net-  
4           working in Mexico and Central America.

5           (8) To combat these destabilizing threats,  
6           through a variety of authorities, the Department of  
7           Defense advises, trains, educates, and equips vetted  
8           troops in Mexico and many of the nations of Central  
9           America to build their militaries and police forces,  
10          with an emphasis on human rights and building  
11          partnership capacity.

12          (b) SENSE OF CONGRESS.—It is the sense of Con-  
13          gress that—

14                 (1) the Department of Defense should continue  
15                 to focus on combating illicit networking routes in  
16                 Mexico and Central America;

17                 (2) United States Northern Command and  
18                 United States Southern Command should continue  
19                 to work together to combat the transnational nature  
20                 of these threats; and

21                 (3) the Department of Defense should increase  
22                 its maritime, aerial and intelligence, surveillance,  
23                 and reconnaissance assets in the region in order to  
24                 reduce the amount of illicit networking flowing into  
25                 the United States.

2 **DEFENSE TO COMPROMISES OF CLASSIFIED**  
3 **INFORMATION.**

4 (a) FINDINGS.—Congress makes the following find-  
5 ings:

6 (1) Compromises of classified information cause  
7 indiscriminate and long-lasting damage to United  
8 States national security and often have a direct im-  
9 pact on the safety of warfighters.

10 (2) In 2010, hundreds of thousands of classified  
11 documents were illegally copied and disclosed across  
12 the Internet.

13 (3) Classified information has been disclosed in  
14 numerous public writings and manuscripts endan-  
15 gering current operations.

16 (4) In 2013, nearly 1,700,000 files were  
17 downloaded from United States Government infor-  
18 mation systems, threatening the national security of  
19 the United States and placing the lives of United  
20 States personnel at extreme risk. The majority of  
21 the information compromised relates to the capabili-  
22 ties, operations, tactics, techniques, and procedures  
23 of the Armed Forces of the United States, and is the  
24 single greatest quantitative compromise in the his-  
25 tory of the United States.

1           (5) The Department of Defense is taking steps  
2 to mitigate the harm caused by these leaks.

3           (6) Congress must be kept apprised of the

2 **THE RUSSIAN FEDERATION OF ITS OBLIGA-**  
3 **TIONS UNDER THE INF TREATY.**

4 (a) FINDINGS.—Congress finds that—

13 1988; and

14 (2) such behavior poses a threat to the United  
15 States, its deployed forces, and its allies.

16 (b) SENSE OF CONGRESS.—It is the sense of Con-  
17 gress that—

18 (1) the President should hold the Russian Fed-  
19 eration accountable for being in material breach of  
20 its obligations under the INF Treaty;

23 military systems that constitute the material breach  
24 of its obligations under the INF Treaty;

25 (3) the President should seriously consider not  
26 engaging in further reductions of United States nu-

1 clear forces generally and should seriously consider  
2 not engaging in nuclear arms reduction negotiations  
3 with the Russian Federation specifically until such  
4 complete and verifiable elimination of the military  
5 systems has occurred; and

6 (4) the President, in consultation with United  
7 States allies, should consider whether it is in the na-  
8 tional security interests of the United States to uni-  
9 laterally remain a party to the INF Treaty if the  
10 Russian Federation is still in material breach of the  
11 INF Treaty beginning one year after the date of the

22 obtain the complete and verifiable elimination of its  
23 military systems that constitute the material breach  
24 of its obligations under the INF Treaty.

1           (2) The President’s assessment as to whether it  
2 remains in the national security interests of the  
3 United States to remain a party to the INF Treaty,  
4 and other related treaties and agreements, while the  
5 Russian Federation is in material breach of its obli-  
6 gations under the INF Treaty.

4 (1) the continuing and long-standing pattern  
5 and practice by the Government of the Russian Fed-  
6 eration of physical, diplomatic, and economic aggres-  
7 sion toward neighboring countries is clearly intended  
8 to exert undue influence on the free will of sovereign  
9 nations and peoples to determine their own future;

10 (2) the Russian military build-up and aggres-  
11 sive posture on the eastern border of Ukraine rep-  
12 resent a deliberate intent to intimidate Ukraine and  
13 to force its citizens to submit to Russian control;

15 cease all improper and illegal activities in Ukraine;

16 (4) the 1994 Budapest Memorandum on Secu-  
17 rity Assurances, which was executed jointly with the  
18 Russian Federation, Ukraine, and the United King-  
19 dom, represents a commitment to respect the inde-  
20 pendence, sovereignty, and territorial integrity and  
21 borders of Ukraine, and Russian actions clearly vio-  
22 late the commitment made by the Russian Federa-  
23 tion in that memorandum;

24 (5) the security cooperation with the Ukrainian  
25 military by the United States military is an impor-

1       tant opportunity to support the continued  
2       professionalization of the Ukrainian military;

3               (6) an enhanced military presence and readi-  
4       ness posture of the United States military in Europe  
5       is key to deterring further Russian aggression and  
6       assuring allies and partners; and

7               (7) the treaty commitments under Article 5 of  
8       the North Atlantic Treaty signed at Washington,  
9       April 4, 1949, and entered into force August 24,  
10       1949, are important and a cornerstone to inter-  
11       national security.

2 **STATES PRESENCE AND COOPERATION IN**  
3 **THE ARABIAN GULF REGION TO DETER IRAN.**

4 It is the sense of Congress that—

5 (1) the United States should maintain a robust  
6 forward presence and posture in order to support  
7 United States allies and partners in the Arabian  
8 Gulf region, including Gulf Cooperation Council  
9 (GCC) countries and Israel, and to deter Iran;

10 (2) the United States should seek ways to sup-  
11 port the security posture of GCC countries in the  
12 Arabian Gulf region to deter Iran;

13 (3) key strategic United States bases in the  
14 Arabian Gulf region that are used to deter Iran and

9 and present issues of concern of the United States,  
10 the International Atomic Energy Agency, and the  
11 United Nations, including the possible military di-  
12 mensions of Iran's nuclear program;

13 (8) the United States should continue to put  
14 significant pressure on Iran's network of organiza-  
15 tions that conduct malign activities in the Arabian  
16 Gulf region, and around the globe, even while the  
17 United States engages in negotiations with Iran re-  
18 lating to Iran's nuclear program; and

19 (9) the United States Government should not  
20 enter into a contract with any person or entity that  
21 is determined to have violated United States sanc-  
22 tions laws with respect to contracting with the Gov-  
23 ernment of Iran and should encourage United States  
24 allies, partners, and other countries to maintain the  
25 same contracting standard.

## TITLE I—PROCUREMENT

### AIRCRAFT PROCUREMENT, ARMY

#### Items of Special Interest

##### *Army Signals Intelligence modernization*

The committee understands that there are at least six Army Signal Intelligence (SIGINT) programs in use or planned for near-term fielding, including: Guard Rail Common Sensor; Enhanced Medium Altitude Reconnaissance and Surveillance System; Tactical SIGINT Program; Quick Reaction Capability C-12s; Airborne Reconnaissance Low; and the Prophet ground SIGINT collection platform. The committee is concerned that maintaining six different SIGINT collection systems for these platforms is costly and inefficient, as well as potentially unsustainable given the current fiscal environment.

Therefore, the committee directs the Secretary of the Army to provide a report to the congressional defense committees and the congressional intelligence committees by February 16, 2015, that would present a SIGINT modernization plan, including a detailed plan of action and milestones with anticipated costs and schedules. The report should also consider the advisability and feasibility of potentially converging all six Army SIGINT programs to a common hardware baseline that is contractor independent, with open architecture that could allow for the use of software reprogrammable radios, as well as provide the capability for insertion of emerging technologies and collection capabilities.

##### *Divestiture of rotorcraft through Army's Aviation Restructure Initiative*

The committee is aware of the Army's plan to divest certain rotorcraft, such as the OH-58D Kiowa Warrior, OH-58 A/C, and TH-67 primary training helicopters, as part of its Aviation Restructure Initiative. While the committee understands the fiscal pressures facing the Army and supports its efforts to restructure the rotorcraft force, the committee is concerned that the planned divestiture of more than 750 aircraft between fiscal years 2015-19 could have a negative impact on the rotorcraft industrial base which has already been impacted by declining defense spending.

Therefore, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services by September 1, 2014, on the criteria for transferring these helicopters as excess defense articles into the domestic and international markets. As part of this briefing, the Army should

include an assessment of how its criteria for divestiture meet all Federal laws and regulations governing such equipment, including:

(1) A statement outlining the purposes for which the article is being provided to any foreign country, including whether such article has been previously provided to that country;

(2) An assessment of the impact of the transfer on the military readiness of the United States;

(3) An assessment of the impact of the transfer on the national technology and industrial base and, particularly, the impact on opportunities of entities in the national technology and industrial base to sell new or used equipment to foreign countries to which such articles might be transferred; and

(4) A statement describing the current value of such articles and the value of such articles at acquisition.

## AIRCRAFT PROCUREMENT, AIR FORCE

### Items of Special Interest

#### *C-130H Avionics Modernization Program and propulsion system upgrades*

The budget request contained \$35.9 million for C-130H aircraft modifications, but contained no funding for the Avionics Modernization Program (AMP) or propulsion system upgrades.

The committee notes that the 2014 Quadrennial Defense Review (QDR) states that the Air Force will maintain 300 combat-coded C-130H and C-130J aircraft in the tactical airlift fleet inventory to support requirements and objectives in support of the 2012 Defense Strategic Guidance. In the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) and the Department of Defense Appropriations Act, 2014 (division C of Public Law 113-76), Congress authorized and appropriated \$47.7 million for AMP and \$41.7 million for propulsion system upgrades.

The committee is disappointed that the Secretary of the Air Force invested nearly \$1.5 billion of taxpayer dollars for engineering, manufacturing, development, and testing of the C-130H AMP program, but has no plans to continue procurement and installation of C-130H AMP onto C-130H aircraft. In addition, the committee notes that the Secretary has no plans to modernize or upgrade the C-130H propulsion system in order to increase reliability, capability, fuel efficiency and on-wing time of the engine, as well as decrease the overall cost and maintenance burden of the current propulsion system. The Secretary has not provided the committee with a coherent plan for fleet-wide recapitalization of the C-130H fleet or explained how the Air Force plans to maintain medium-sized intra-theater airlift capacity and capability within both the Active and Reserve Components. The committee understands that the cost to continue the C-130 AMP program, as compared to the costs to individually complete modernization and upgrade requirements to keep the C-130H aircraft capable and relevant, are roughly the

same. However, the committee believes that by failing to take actions to modernize the C-130H fleet in the very near term with C-130 AMP and propulsion systems upgrades, recapitalization costs, mitigation of obsolescence and diminishing manufacturing sources costs, or operating and sustainment costs will become so cost prohibitive in the future that the only course of action available to the Secretary will result in the divestiture of the C-130H aircraft from the Air Force inventory. Knowing that the majority of the C-130H fleet resides within the Reserve Components of the Air Force and that the C-130H should remain reliable, capable, and relevant to meeting current and future warfighter needs, the committee is concerned with the approach that the Secretary has taken with regard to the lack of robust modernization and upgrade of C-130H aircraft, if the aircraft is to have a service-life through 2040 as currently planned. Furthermore, C-130 AMP is estimated to reduce total ownership costs of the C-130H fleet by over 25 percent as compared to not modernizing the aircraft. The committee believes that if the Secretary is willing to expend at least \$3.2 billion for two new presidential aircraft to achieve a benefit of a modernized and digital cockpit for the aircrew to execute an important mission in a benign flight environment, the Secretary should apply similar logic by spending significantly less than \$3.2 billion for 179 C-130H aircraft that would provide a modernized and digital cockpit for C-130 aircrews that are required to tactically employ in more strenuous and dangerous flight conditions.

Elsewhere in this Act, the committee includes a provision that would preserve the \$1.5 billion taxpayer investment in the C-130 AMP program and would prohibit the Secretary from canceling the C-130 AMP program. Further, the committee directs the Secretary of the Air Force to notify the congressional defense committees at any time the combat-coded fleet of C-130H and C-130J aircraft decreases below the 300 combat-coded aircraft prescribed in the 2014 Quadrennial Defense Review. Finally, the committee directs the Under Secretary of Defense (Comptroller) and the Secretary of the Air Force to immediately obligate authorized appropriations provided in fiscal year 2013 and fiscal year 2014 to continue C-130 AMP.

Therefore, the committee recommends \$109.7 million, an increase of \$73.8 million, for C-130H propulsion system propeller and engine control upgrades, continued acquisition and installation of C-130 AMP kits, and no funding to begin an alternative communications, navigation, surveillance and air traffic management (CNS/ATM) system program.

### *High-altitude intelligence, surveillance, and reconnaissance*

Over the past 2 years, the committee has supported the Global Hawk Block 30 high-altitude unmanned aerial system and supports the current Department of the Air Force plan to retain the Global Hawk Block 30 for the high-altitude intelligence, surveillance, and reconnaissance (ISR) mission. The committee notes that the Department of the Air Force has determined that Global Hawk operating costs have decreased while the Global Hawk Block 30 fleet has flown an increased

number of hours compared to previous years in support of the combatant commanders.

While the committee was pleased that the Air Force requested funding for Global Hawk Block 30 in the budget request for fiscal year 2015, the committee is concerned with the Department of the Air Force's plan to retire the U-2 fleet in fiscal year 2016. While the committee realizes that the Department can never fully meet the ISR demand of combatant commanders, reasonable and necessary ISR requests appear very likely to go unfilled if the current high-altitude airborne ISR collection capabilities of the U-2 are terminated. The committee notes that section 143 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) required the Secretary of Defense, in coordination with the Chairman of the Joint Chiefs of Staff, to submit a report on all high-altitude ISR systems. The committee has not yet received this report and believes that any action to retire, or prepare to retire U-2 aircraft would be premature prior to the committee's review of the report. To ensure that no actions are taken to retire or prepare to retire the U-2 aircraft in fiscal year 2015, elsewhere in this Act, the committee includes a provision that would prohibit the obligation or expenditure of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2015 to make significant changes to retire, prepare to retire, or place U-2 aircraft in storage.

The committee also notes that section 133 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) limits the retirement of U-2 aircraft until equal or greater ISR capability is available to commanders of the combatant commands, and believes that the Department of the Air Force plan to retire the entire fleet of U-2s in fiscal year 2016 is inconsistent with this provision.

The committee supports the Department of the Air Force efforts to upgrade the Global Hawk Block 30 aircraft to meet the requirements of the combatant commanders, but notes that this will take several years beyond the planned retirement of the U-2. In light of the known gaps, the committee has concerns with any plan that will leave the combatant commanders with less overall capacity and capability than they have today.

Therefore, the committee directs the Secretary of the Air Force, in coordination with the Chairman of the Joint Chiefs of Staff, to provide a report to the congressional defense committees and the congressional intelligence committees by February 16, 2015, that would establish a phased high-altitude airborne ISR transition plan which fields capability at the same time or before the U-2 aircraft retirement, and which would result in equal or greater capability available to the commanders of the combatant commands. This plan should include the costs, schedule, and identification of fielded high-altitude ISR capability and capacity. If retirement of the U-2 would result in decreased capability or capacity for high-altitude reconnaissance, the report should also include the Department of the Air Force plans to mitigate the effects of the decreased capability or capacity.

### *KC-10 Aerial Refueling Aircraft Force Structure*

The committee notes that the President's request for the Future Years Defense Program 2016-19 did not take into account Budget Control Act of 2011 (Public Law 112-25) sequestration level Department of Defense spending limitations.

The committee understands that if the spending limitations in Public Law 112-25 are imposed on the Department of the Air Force beyond fiscal year 2015, then additional reductions in critical capabilities and aircraft force structure will likely be necessary in order for the Department of the Air Force to comply with its share of spending authority. The committee understands from briefings and discussions with Air Force officials that the KC-10 Stratotanker aircraft could succumb to sequestration impacts. The committee is concerned that a divestment of a high-demand, low-density aircraft such as the KC-10 could have detrimental impacts for the Department of Defense in meeting its global reach and global power objectives, as it relates to supporting the 2012 Defense Strategic Guidance. The committee also notes that the Commander, U.S. Transportation Command (CUSTC) has validated that the requirement for aerial refueling aircraft capability is 567 aircraft. The Department of the Air Force currently has only 454 aerial refueling aircraft, resulting in a deficit of 113 aircraft short of the CUSTC requirement. The Air Force is not projected to have 567 aerial refueling tankers in its inventory, assuming that no KC-10 or KC-135 are divested, prior to delivery of the 112th KC-46 tanker aircraft in the next decade.

Therefore, elsewhere in this title, the committee includes a provision that would prohibit the Secretary of the Air Force from using any funds or taking any action during fiscal year 2015 to divest or transfer, or prepare to divest or transfer, any KC-10 aerial refueling aircraft of the Air Force. In addition, if the President's request for fiscal year 2016 proposes to divest the KC-10 aerial refueling aircraft from the Department of the Air Force, the committee directs the Commander, U.S. Transportation Command, in coordination with the Chairman of the Joint Chiefs of Staff, to submit to the congressional defense committees at the time of the fiscal year 2016 budget submission, an operational risk assessment and mitigation strategy that evaluates the military's ability to meet the requirements and objectives stipulated in the Department's Guidance for Employment of the Force, the Joint Strategic Capabilities Plan, and all geographical combatant commander steady-state rotational and warfighting surge contingency operational planning documents.

## PROCUREMENT, DEFENSE-WIDE

### Items of Special Interest

#### *Iron Dome short-range rocket defense system and U.S.-based coproduction*

The budget request contained \$176.0 million in PE 28866C for the Iron Dome short-range rocket defense system.

The committee has supported the Iron Dome Weapons System since the State of Israel's first request for U.S. funding in fiscal year 2011. Since the first authorization of Missile Defense Agency (MDA) funding, U.S. taxpayers have provided \$720.0 million for the program. The committee is aware that the Israeli requirement may necessitate up to \$175.0 million in addition to the \$176.0 million contained in the President's request.

The committee has received "The Agreement Between the Department of Defense of the United States of America and the Ministry of Defense of the State of Israel Concerning Iron Dome Defense System Procurement," signed on March 5, 2014. The committee is pleased that this agreement resolves many details of U.S. coproduction of Iron Dome components and interceptors in the United States. The committee is aware that MDA and the Israeli Missile Defense Organization (IMDO) have entered into an international agreement to govern how the United States funds up to \$680 million between fiscal years 2012-15 for Iron Dome. The committee is concerned that the agreement does not cover the full amount it recommends for fiscal year 2015. Given the significant U.S. taxpayer investment in this system, the committee believes that coproduction of parts and components should be done in a manner that will maximize U.S. industry participation in interceptor and battery deliveries for Israel's defense needs. The committee recommends \$351.0 million, an increase of \$175.0 million, in PE 28866C for the Iron Dome short-range rocket defense system.

However, the committee expects that the Director, Missile Defense Agency will not obligate or expend \$175.0 million of that amount, and instead hold it in reserve and disburse it incrementally until receipt and acceptance by the MDA of sufficiently detailed cost and schedule justification from the Government of Israel. Such detailed cost and schedule justification must include:

- (1) A timeline for Iron Dome expenditure of funds above the President's request for the fiscal year for which the funds were appropriated or made available;
- (2) Copies of signed and ratified contracts, subcontracts, and teaming arrangements between Israeli and U.S. industry for all Iron Dome coproduction efforts;
- (3) Delivery to MDA of all technical data packages as accepted by U.S. industry suppliers for coproduction; and
- (4) A common cost model of Iron Dome components, to be jointly developed and agreed upon by MDA and IMDO that includes: recurring and non-recurring engineering costs; estimates for future buys and actual costs beginning with fiscal year 2013; the required quantities for all components through fiscal year 2019; and component lead-times and delivery schedules.

Additionally, the committee expects the Director, Missile Defense Agency will ensure that: Iron Dome operational data has been provided per previous commitments; this additional funding be applied to the work share percentage for fiscal year 2015 funding between U.S. and Israeli industry as proscribed under the recently signed Iron Dome Procurement Agreement; and that the additional funds are required to meet Israeli defense needs. Any funds found to be in excess of

Israel's justified and documented needs during fiscal year 2015 may be transferred by the MDA to appropriations available for the procurement of weapons and equipment according to priority needs.

The committee also believes that if there is a request for Iron Dome funding for fiscal year 2016, the Director, Missile Defense must establish for the committee how those funds will resolve details and agreements needed for U.S.-based coproduction of all-up-rounds and cover the export of Iron Dome technology to U.S. and Israeli allies, including coproduction of parts, components, and all-up-rounds of those exports.

The committee directs the Director, Missile Defense Agency, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics, to provide a report to the congressional defense committees not later than October 1, 2014, on the information provided in the required detailed cost and schedule justification, including the views of the Director and the Under Secretary on its sufficiency.

Further, the committee directs the Director, Missile Defense Agency to provide a briefing to the congressional defense committees not less than once each quarter in fiscal year 2015, starting October 1, 2014, on the progress in achieving the requirements established in "The Agreement Between the Department of Defense of the United States of America and the Ministry of Defense of the State of Israel Concerning Iron Dome Defense System Procurement."

## TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

### RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY

#### Items of Special Interest

##### *Amphibious Combat Vehicle increment 1.1 program*

The budget request contained \$105.7 million in PE 63611M for the Amphibious Combat Vehicle (ACV) program.

The committee understands that the Marine Corps has significantly changed its acquisition strategy for the ACV program and will now use an incremental approach to developing, procuring, and fielding a next generation family of amphibious combat vehicles. The committee notes that in the near term, the Marine Corps is planning to use the first vehicle increment, ACV increment 1.1, as an armored personnel carrier that would deliver marines from ship-to-shore by means of a connector craft, and be used for inland missions. The committee recognizes this would address an immediate near-term, urgent capability gap for improved tactical mobility and survivability for deployed Marine infantry units.

The committee notes that while the proposed schedule for ACV increment 1.1 is aggressive, the committee expects the Marine Corps to benefit from lessons learned from previous next generation assault amphibious vehicle programs that

suffered from requirements creep and immature technology readiness levels that led to significant cost overruns and schedule delays. The committee understands that results from previous developmental testing conducted on vehicles participating in the former Marine Personnel Carrier (MPC) vehicle program, to include limited user demonstrations, have informed the Marine Corps that the technology for these potential vehicles is highly mature and is consistent with a stable set of requirements for this vehicle. Accordingly, the committee understands that the Marine Corps is recommending a streamlined procurement and fielding strategy for the ACV increment 1.1 vehicle. The committee supports the intent to streamline the procurement and fielding of the ACV increment 1.1 vehicle, and believes this program could potentially serve as an example for future major defense acquisition program reform. However, the committee notes that this streamlined approach to ACV increment 1.1 is contingent on mature technology and validated and stabilized requirements. The committee will continue to closely monitor this program under the auspices of the committee's ongoing comprehensive acquisition reform effort.

Therefore, the committee directs the Assistant Secretary of the Navy (Research, Development, and Acquisition), in coordination with Headquarters Marine Corps, to brief the committee not later than September 1, 2014, on the justification used to streamline the ACV increment 1.1 vehicle program, to include the documented results from the Marine Requirements Oversight Council and the Joint Requirements Oversight Council reviews, as well as the documented results from the Materiel Development Decision. The committee also directs the Assistant Secretary to brief the committee on any potential procedural and/or regulatory barriers that may prevent the Marine Corps from streamlining the ACV increment 1.1 program. Based on information already provided to the committee by the Marine Corps regarding the streamlined procurement strategy for the ACV increment 1.1 program, the committee understands additional funds would also be required in fiscal year 2015 to support a contract award in fiscal year 2015.

The committee recommends \$190.8 million, an increase of \$85.1 million, in PE 63611M for the ACV Increment 1.1 vehicle program.

#### *Next Generation Land Attack and Offensive Anti-Surface Warfare weapon development*

The budget request contained \$32.4 million in PE 24229N for Tomahawk and Next Generation Land Attack Weapon (NGLAW) development. The budget request also contained \$194.3 million in Weapons Procurement, Navy for procurement of 100 Tomahawk missiles, which is a decrease of 96 missiles from what had been planned for procurement in the fiscal year 2014 budget request. The budget request also proposes to terminate Tomahawk Block IV procurement beginning in fiscal year 2016. In addition, the budget request contained \$203.0 million in PE 64786N for development of Increment I and Increment II of the Offensive Anti-Surface Warfare (OASUW) weapon.

The committee is concerned by the Secretary of the Navy's recommendation to terminate procurement in 2016 of the Nation's only long-range, surface-launched land-attack cruise missile production capability prior to finalizing concept development of NGLAW, which is not planned to be operationally fielded until 2024 at the earliest. Furthermore, the committee is concerned that the capability to recertify current inventory Block IV Tomahawk missiles could be put at risk if the Secretary of the Navy decides to shutter the Tomahawk Block IV production line in fiscal year 2016. The committee is also concerned that the Secretary has not clearly articulated a medium- to long-range conventional cruise missile requirements and capabilities strategy or roadmap that explains the bridge between production of current missiles to the development, production, and fielding of OASUW and NGLAW. The Secretary has also not clearly articulated how the missile requirements and capabilities differ between OASUW and NGLAW in meeting combatant commander requirements, or the reason that a separate missile is needed for OASUW and NGLAW in order to meet offensive surface-attack mission requirements. Further, the Secretary has not clearly articulated how the inventory stock of long-range cruise missiles will be replenished if the current stock of Tomahawk missiles is utilized to fulfill test, training, and warfighting requirements between 2016-24. The committee is also concerned that the Navy is well below all categories of inventory requirements and is discouraged that the Navy is only using one category of inventory requirements in stating that there is no risk by terminating Tomahawk Block IV production in fiscal year 2016.

The recommendation to shutter the Tomahawk Block IV production line is further compounded by the fact that OASUW Increment I is just beginning to transition to a program of record, and OASUW Increment II is still in the concept definition and refinement phase. The committee supports current efforts to develop an OASUW Increment I capability to fulfill the urgent operational need of the Commander, U.S. Pacific Command, and encourages the Secretary to aggressively pursue fielding this capability.

Therefore, the committee is skeptical of the Secretary of the Navy's decision to cease production of Tomahawk Block IV in 2016. The committee directs the Secretary of the Navy to provide a report to the congressional defense committees in conjunction with the submission of the budget request for fiscal year 2016, that articulates the following: (1) a 15-year medium to long-range land attack cruise missile strategy and roadmap; (2) known or anticipated shortfalls and capability gaps of current cruise missiles; (3) an explanation of requirement differences between OASUW and NGLAW missile capabilities; (4) a transition strategy from current production land-attack cruise missiles to recertification of current inventory cruise missiles that discusses anticipated cost, schedule, and execution risks and issues; and (5) the cost, schedule, and execution risk associated with replenishment of current inventory cruise missiles that may be used for test, training, and operational requirements in order to maintain a sufficient inventory of cruise missiles until NGLAW is operationally fielded. The report may contain a classified

annex or any other information that the Secretary desires to convey to the congressional defense committees.

The committee recommends \$32.4 million, the full amount requested, in PE 24229N for Tomahawk and Next Generation Land Attack Weapon (NGLAW) development. The committee recommends \$276.3 million, an increase of \$82.0 million, in Weapons Procurement, Navy for procurement of 196 Tomahawk missiles and to reduce risk to the Tomahawk missile industrial base. Elsewhere in this Act, the committee includes a provision that would authorize multi-year procurement authority for Tomahawk Block IV missiles if the Secretary of the Navy determines during deliberations of the fiscal year 2016 budget request that it is not prudent to shutter the production line at this time. The committee would support the Secretary's decision to procure the maximum amount of additional missiles to fully satisfy inventory requirements and bridge transition to Tomahawk Block IV recertification and modernization in the most cost-effective manner possible, and especially during periods of constrained fiscal resources. Finally, the committee recommends \$203.0 million, the full amount requested, in PE 64786N for development of Increment I and Increment II of the Offensive Anti-Surface Warfare weapon.

#### RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

##### Items of Special Interest

##### *Air Force tactical exploitation of national capabilities talon hate program*

The Department of the Air Force Tactical Exploitation of National Capabilities (AFTENCAP) project pursues a wide range of technological and operational objectives through transition of proven national capabilities to warfighters for operational use and participation in design of future national capabilities in order to leverage them for tactical users. The committee supports the TENCAP program.

The Talon Hate program, developed under AFTENCAP, fields in fiscal year 2015 and should provide a unique multi-domain capability to counter threats in the U.S. Pacific Command (USPACOM) area of responsibility (AOR). The committee understands the importance of reliable, jam-proof communications between 4th and 5th generation fighters, the need to broadcast multi-source information in a Link 16 compatible format, and the need to integrate national strategic data into that communication network. While the Talon Hate program will field four developmental pods for F-15s in the USPACOM AOR, the committee is concerned that a strategic plan to address this mission has not been developed, along with an analysis of alternative technical approaches to meeting the associated warfighter requirements.

Therefore, the committee directs that the Secretary of the Air Force, in coordination with the Chairman of the Joint Chiefs of Staff and the Under Secretary of Defense for Intelligence, to provide a briefing to the House Committee

on Armed Services and the House Permanent Select Committee on Intelligence, by February 16, 2015, on the enduring military requirements associated with the Talon Hate program, a comprehensive cost and benefit analysis of the various technical approaches to solving those requirements, and the associated strategic plan to addressing the requirements including near and mid-term recommendations.

*Ejection seat safety and reliability improvement program*

The budget request contained no funds for the procurement of modernized and upgraded ejection seats for Department of the Air Force fighter and bomber aircraft.

The committee understands that aircraft aging and heavy operations tempo have produced fatigue and corrosion in legacy ejection seat designs which were designed and procured by the Department of the Air Force in the mid-1970s. The committee further understands that the incorporation of modern helmet mounted displays creates significant risk to pilot survival during high-speed ejections because aerodynamic forces at high speeds within the current ejection seat operational envelope lift the modern helmet off the pilot, generating high-neck tension loads. Data indicates that the Joint Helmet Mounted Cueing System and helmet mounted displays in tactical fighter aircraft can structurally fail above 450 knots, which causes wind-stream aerodynamics on the pilot's helmet to generate neck tension loads over 700 pounds, well above risk-of-injury thresholds to the pilot. The committee notes that the Department of Defense Military Handbook 516B (MIL-HDBK-516B) for Airworthiness Certification Criteria prescribes a requirement for less than 5 percent risk of major injury resulting from an aircraft ejection event, but that the requirement stipulated is not being met today for ejection seats in legacy fighter aircraft or fifth generation tactical aircraft. The committee understands that state-of-the art upgraded ejection seats can effectively address these risks while at the same time providing significantly improved ease of maintenance and increased aircraft availability, but the Department of the Air Force has failed to take advantage of the new and improved ejection seat technology that would greatly enhance protection of pilots in ejection seat aircraft during emergency situations. The committee notes that the high-speed ejection of a tactical fighter pilot in January 2014 resulted in a pilot fatality because of the ejection's high-neck tension load encountered during the ejection.

Subsequently, the committee encourages the Department of the Air Force to develop a strategy to begin replacing the 1970s-designed ejection seats equipped in most legacy fighter and bomber aircraft as soon as possible. The committee believes that minimizing sustainment life-cycle costs through commonality with currently-fielded components should also be included as a prime determinant in selecting an upgraded ejection seat.

Accordingly, the committee directs the Inspector General of the Department of Defense to provide a report to the congressional defense committees with the

submission of the President's fiscal year 2016 budget to Congress, that articulates which Department of Defense type, model, series ejection seat equipped aircraft meet the aircrew survivability and equipment airworthiness requirements stipulated by current policy and regulation of the Department for pilots and aircrew that wear advanced helmet display equipment, night vision goggles, or both, during flying operations.

Therefore, elsewhere in this Act, the committee establishes two budget lines in research, development, test, and evaluation, Air Force account, and the Aircraft Procurement, Air Force account titled "Ejection Seat Reliability Improvement Program". The committee recommends \$10.5 million, an increase of \$10.5 million, of which \$3.5 million is for initial qualification in the research, development, test, and evaluation, Air Force account, and \$7.0 million is for initial installation of upgraded ejection seats in the Aircraft Procurement, Air Force account.

### *Moving target indicator way ahead*

Combat Operations in the Islamic Republic of Afghanistan and the Republic of Iraq have highlighted a growing demand for airborne moving target indicator (MTI) sensing as well as significant phenomenologically-driven performance limitations in counter-insurgency and counter-terrorism operating environments. The committee understands that the Department of the Air Force intends to recapitalize the E-8C joint surveillance and targeting radar attack system (JSTARS) fleet on a more efficient airframe with modern radar, avionics, and communications systems, and an on-board battle management and command and control capability. Well ahead of the initial operating capability (IOC) of any replacement platform, the Department of the Air Force intends to reduce the E-8C fleet by nearly one third, by reducing the E-8C JSTARS fleet from 16 to 11 aircraft, and to begin incrementally reducing associated E-8C JSTARS manpower.

At the same time, the committee notes that the Department of the Air Force continues to test and field Global Hawk Block 40 aircraft with the multi-platform radar technology insertion program (MP-RTIP) MTI radar, eventually fielding 11 high-altitude, long endurance aircraft. In contrast, the committee also notes that the Department of the Air Force development efforts relating to the vehicle dismount and exploitation radar (VADER) transitioned to the Army with no apparent plans to field a capability on Department of the Air Force remotely piloted aircraft (RPA).

The committee is concerned that the volume and pace of change in MTI development and fielding may be indicative of a lack of precision in the underlying requirement set. While the JSTARS recapitalization platform is planned to achieve far better performance in the areas of higher altitudes, superior sensing, increased operational availability and speed, the number of platforms to be fielded is identical to that of JSTARS. However, the requirement for the number of JSTARS was established long before 11 long-endurance high altitude MTI platforms were

developed. Limitations in MTI performance against dismounts that led to the development of the VADER have not been addressed in either JSTARS or MP-RTIP and have yet to be defined for the JSTARS recapitalization aircraft.

Therefore, the committee directs the Secretary of the Air Force, in coordination with the Chairman of the Joint Chiefs of Staff, to provide a report to the congressional defense committees and the congressional intelligence committees by February 16, 2015, that captures the aggregate requirement for MTI capability and capacity for the Department of Defense. The report should detail the current validated requirements for MTI capacity for Global Hawk Block 40, JSTARS, and the JSTARS recapitalization aircraft. Requirements should be expressed in terms of sensor fidelity using metrics such as ground radar coverage area, revisit rate, minimum detection velocity, target locating error, hours on-station per mission per month and per year, sorties per month and per year, and anticipated targets types and density. The report should also highlight the degree to which the current Air Force plan, including the near-term reductions in JSTARS capacity and the end-state aggregate of 27 MTI aircraft compare to the underlying requirement.

### TITLE III—OPERATION AND MAINTENANCE

#### ITEMS OF SPECIAL INTEREST

##### BUDGET REQUEST ADJUSTMENTS

##### Corrosion Prevention

The committee commends the Department of Defense on the formulation of policy and guidance to address corrosion, which costs the military departments more than \$20.0 billion annually and leads to decreased readiness, increased manpower requirements, and significantly higher life-cycle sustainment costs. However, despite addressing the issue in the committee report (H. Rept. 113-102) accompanying the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66), the committee is concerned about the pace of acquisition of proven anti-corrosion products and the resulting impacts on sustainment costs. The committee is also concerned about the impact inadequate resourcing may have on the pace of anti-corrosion technology development. Therefore, the committee directs the Secretary of Defense to provide a briefing to the House Committee on Armed Services by March 1, 2015, on the implementation of corrosion prevention measures both within the military departments and the Corrosion Prevention Program Office.

Further, the budget request contained \$4.8 million in operation and maintenance funding for the Corrosion Prevention Program in addition to military department and departmental research efforts to combat corrosion, which the committee believes to be inadequate. The committee recommends an additional \$20.0 million to be divided equally among the military departments' corrosion prevention efforts and the defense-wide Corrosion Prevention Program.

## OTHER MATTERS

### Office of Net Assessment

The budget request contained \$8.9 million within Operation and Maintenance, Defense-wide, for the Office of the Secretary of Defense for the Office of Net Assessment (ONA).

The committee notes that the Department of Defense continues to decrement the proposed funding for the office. The committee is concerned that this decrement, in conjunction with the Secretary of Defense's plan to realign the office under the Office of the Under Secretary of Defense for Policy, may limit the ability and flexibility of ONA to conduct long-range comparative assessments. The office has a long history of providing alternative analyses and strategies that challenge the "group think" that can often pervade the Department of Defense. The committee believes that the growing array of complex security challenges facing the United States, as highlighted in the 2014 Quadrennial Defense Review, coupled with a constrained budget environment, will only create greater demand for the unconventional thinking and solutions that the Office is capable of providing.

One such challenge is in the area of space deterrence, and elsewhere in this Act, the committee includes a provision that would require the office to conduct a study of potential alternate defense and deterrent strategies in response to the existing and projected counterspace capabilities of the People's Republic of China and the Russian Federation.

The committee therefore recommends \$18.9 million, an increase of \$10.0 million, for fiscal year 2015 for the Office of Net Assessment. This recommended authorization is reflected in a new funding line for the Office of Net Assessment within Operation and Maintenance, Defense-wide, as shown in section 4301 of this Act.

Also, elsewhere in this Act, the committee includes a provision that would codify the Office within chapter 4 of title 10, United States Code, and establish a dedicated program element for budgeting purposes. The committee believes the office must remain an independent organization within the Department reporting directly to the Secretary. However, the committee also recognizes that improvements can be made within the Department to ensure the office's assessments better inform and influence its overall strategy and policy. Therefore, the committee directs the Secretary of Defense to submit to the House Committee on Armed Services, not later than September 5, 2014, a plan for how the Department can better leverage the Office as well as a description of the activities, deliverables, and allocation of funds planned for the Office of Net Assessment for fiscal year 2015.

United States Special Operations Command Proposed Sponsorship of U.S. Naval Ship Sumner

The committee is aware that the United States Special Operations Command (USSOCOM) recently requested transfer of sponsorship of the United States Naval Ship (USNS) Sumner (T-AGS 61) from the Military Sealift Command to USSOCOM to support near-term maritime requirements for United States Southern Command. The committee is also aware that USSOCOM has initiated a new-start procurement using current fiscal year 2014 funds to begin modifications to USNS Sumner estimated at \$8.9 million. The budget request for fiscal year 2015 included \$20.3 million in Operation and Maintenance, Defense-wide, to further modify and operate USNS Sumner within the United States Southern Command area of operations.

The committee is concerned that the proposed transfer of sponsorship of USNS Sumner to USSOCOM and proposed command and control relationships are without precedent, and that projected costs for the current fiscal year and across the Future Years Defense Program will far exceed current estimates. Further, the committee has concerns that the requirement is being funded only by USSOCOM Major Force Program -11 (MFP-11) funds which are limited by section 167 of title 10, United States Code, to provide only the incremental funding and acquisition of special operations-peculiar material, supplies, and services. Since the committee understands that this platform will be used to also support the geographic combatant commander theater campaign plans such as counter-narcotics, humanitarian assistance, and security force assistance, the committee believes that MFP-11 funding is an inappropriate source for these costly modifications and operations, and that MFP-11 is being used to supplant activities that should be provided for by the services and the geographic combatant commander.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the congressional defense committees by August 1, 2014, on the proposed transfer of the USNS Sumner from Military Sealift Command to USSOCOM. The briefing at a minimum should outline:

- (1) The validated requirement as defined by the geographic combatant commander;
- (2) Anticipated costs across the Future Years Defense Program and funding sources;
- (3) Reason for the use of USNS Sumner, to include a business case analysis discussing efficiencies and cost savings; and
- (4) Any other matters the Secretary deems appropriate.

Furthermore, given these concerns, the committee denies the requested amount of \$20.3 million in Operation and Maintenance, Defense-wide, to further modify and operate USNS Sumner and redirects this funding to more direct operational readiness requirements within Operation and Maintenance, Defense-wide, Flying Hours Program for USSOCOM.

## TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

## ITEMS OF SPECIAL INTEREST

### Acquisitions Involving Reverse Auctions

The committee notes that there may be substantial benefits to contracting for goods and services through reverse auction procedures. However, the committee is concerned that Department of Defense personnel, particularly those that are not formally designated within the acquisition workforce, may lack sufficient training and experience to fully realize these benefits. Without adequate training on the benefits and risks of utilizing reverse auction procedures as a purchasing method, acquisition personnel might miss opportunities to stipulate best-value determinations, encourage small business participation, or raise other non-price considerations.

Two studies by the Army Corps of Engineers have posited that reverse auctions for construction services do not provide savings to the government and that they increase risk associated with such projects. While the Corps has discontinued the use of reverse auctions in this area, other agencies continue to use reverse auctions for construction services. A third study by the Government Accountability Office (GAO-14-408) found that there was inadequate competition in nearly 40 percent of governmental acquisitions conducted using reverse auctions. The report recommended that the Director of the Office of Management and Budget take steps to amend the Federal Acquisition Regulations regarding agencies' use of reverse auctions and to issue government-wide guidance for maximizing competition and savings when using reverse auctions.

The committee is also concerned that reverse auction procedures or other procurement methodologies that are aimed solely at making a purchase at the lowest price, may not be the best way to procure personal protective equipment such as body armor components, combat helmets, protective eyewear, and fire resistant clothing. Using price as the deciding factor in the procurement of such items may lead to products of an inferior quality for the warfighter, and have long-term deleterious effects on the industrial base and the willingness of private sector firms to develop products and services for the Department. Therefore, the committee directs the Under Secretary of Defense for Acquisition, Technology and Logistics to review the training and education provided to Department of Defense personnel regarding the use of reverse auction procurement methodologies, and to revise such training and education, as may be necessary, to ensure that Department personnel understand the benefits, risks, and appropriate applications of reverse auction procedures. The Under Secretary should report to the congressional defense committees, not later than March 2, 2015, on the findings of this review.

### Comptroller General Assessment of Department of Defense Processes for the Acquisition of Services

To complement the committee's effort to improve the processes by which the Department of Defense acquires weapon systems, the committee directs the

Comptroller General of the United States to undertake a body of work to identify further opportunities to improve the Department's processes to acquire contracted services.

Over the last decade, Congress has provided new tools and capabilities intended to improve the Department's processes and oversight of services acquisitions. These include requiring the establishment of a management structure and review process for high-dollar services; designation of senior managers responsible for services contract approval and oversight within the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics and the military departments; and the mandating of an annual inventory of contracted services to assist in workforce planning and budgeting.

The committee notes that the Department has undertaken several actions to improve its approach to acquiring services, most recently in the Department's Better Buying Power initiatives. Nevertheless, in a series of reports issued over the past year, the Comptroller General found that the Department still did not know the current status of services acquisitions in terms of the volume or type of services being acquired, lacked reliable data on the projected spending for services, had not fully embraced total workforce management approaches, and had not fully leveraged its buying power through strategic sourcing. With services acquisition accounting for more than half of the Department's contracting efforts, the committee believes that a holistic assessment of the myriad processes that play a role in acquiring services is needed if the Department is to fundamentally improve its efficiency and effectiveness.

Therefore, the committee directs the Comptroller General to continue monitoring the Department's efforts in this area and to conduct a comprehensive assessment of the processes and procedures of the Department of Defense for the acquisition of services to identify opportunities to improve these processes and procedures. An initial report on the assessment should be provided to the congressional defense committees not later than March 1, 2016, with follow-up efforts subsequently briefed to the committees as phases of the assessment are completed. At a minimum, the assessment should examine:

- (1) The requirements generation, budgeting, and contracting processes associated with the acquisition of services;
- (2) How such processes interface with the Department's strategic human capital planning processes;
- (3) The Department's efforts to identify and, as appropriate, enhance the skills and capabilities needed by the workforce to acquire and oversee contracted services;
- (4) The extent to which the Department is acquiring contracted services using strategic sourcing; and
- (5) The extent to which the Department's annual budget request and future budget projections for contracted services are based on current, accurate, and reliable data.

## Comptroller General Review of Compliance with Limitations on Contract Services Spending

The committee notes that a Government Accountability Office review found that the Department of Defense failed to adhere to the enacted limitations on contracted services in the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), exceeding the limitations by more than \$1.0 billion in fiscal year 2012. Moreover, guidance for adherence to the extension of the limitations for fiscal year 2014 has yet to be issued. The committee is concerned that the Department does not have adequate policies, procedures, and controls in place to enforce limitations on the annual amounts expended on contracted services.

The committee is also concerned that not all contracted services are being subjected to the spending limitations because of the exclusion of contracted services involving Economy Act transfers between and within Department of Defense components. Also, because of the disparity between the levels of contracted services captured in the Inventory of Contracts for Services, required under section 2330a of title 10, United States Code, and what the Department budgets for contracted services, the committee concludes that the Department does not deliberately plan for most contracted services. At the same time the Department exceeded its spending limitations on contracted services, the Department furloughed a majority of its civilian workforce and, in the case of many Department of Defense components, under-executed civilian spending.

The committee directs the Comptroller General of the United States to report to the congressional defense committees on the Department's compliance with section 808 of Public Law 112-81, as amended by section 802 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) for each of the fiscal years the limitation has been in effect. The Comptroller General should submit an initial report by October 30, 2014, that covers fiscal years 2012-13. The final report should be submitted by September 30, 2015, and address the Department's compliance during fiscal year 2014. The final report should include an assessment of the efforts by the Under Secretary of Defense (Comptroller) and the Department's financial management and acquisition communities to implement effective control mechanisms for contracted services spending. Additionally, the Comptroller General's review should assess steps taken by defense components in executing the reductions to contractor performance of inherently governmental functions, closely associated with inherently governmental functions, and staff augmentation workload in accordance with the provisions of section 808 of Public Law 112-81.

## Comptroller General Review of Rulemaking Practices of the Department of Defense

The committee is aware that the interim rulemaking process of the Department of Defense allows for the expedited promulgations of rules in certain cases, and that numerous factors lead the Department of Defense to issue interim rules in lieu of proposed rules. The committee notes that interim rules may be

issued for a variety of reasons when cause can be shown that a standard public notice-and-comment period would be impracticable, unnecessary, or contrary to the public interest. Such causes include responses to emergencies, expedient measures to avert threats to public health or safety, and the need to make minor technical or insubstantial changes to regulations. However, the committee is also aware that overreliance on the interim rulemaking process may limit industry participation because that process may not afford opportunities to consider industry comments before, or even after, the final rule takes effect.

Therefore, the committee directs the Comptroller General of the United States to evaluate the Department's rulemaking practices for promulgating acquisition regulations, and specifically the issuance of interim rules rather than the issuance of proposed rules. The evaluation should include:

- (1) A brief description of current rulemaking procedures, including relevant provisions for notice-and-comment;
- (2) An assessment of the frequency with which the interim rulemaking process is used by the Department of Defense to promulgate acquisition regulations;
- (3) Descriptions of the most prevalent good cause justifications given by the Department for using rulemaking options other than the proposed rulemaking process; and
- (4) Any recommendations the Comptroller General may have for improving constructive communications between the Department and industry during the rulemaking process.

The committee directs the Comptroller General to brief the House Committee on Armed Services not later than March 1, 2015, on the results of this evaluation.

### Rare Earth Elements Supply Chain Review

The committee remains concerned about the Department of Defense's ability to mitigate the risks associated with its dependence on foreign-sourced rare earth elements. A February 2014 Department of Defense report titled "Diversification of Supply and Reclamation Activities Related to Rare Earth Elements," received by the committee pursuant to the committee report (H. Rept. 113-102) accompanying the National Defense Authorization Act for Fiscal Year 2014, stated that the Department's mitigation strategy for foreign-sourced rare earth elements used in Department of Defense weapon systems includes "diversification of supply, pursuit of substitutes, and reclamation of waste." However, a separate February 2014 report from the Assistant Secretary of the Navy for Research, Development and Acquisition on the Joint Strike Fighter (JSF), also required by H. Rept. 113-102, discussed the lack of feasibility of implementing such a mitigation strategy for the JSF.

The committee is aware that the development of many modern systems, including the JSF and the AN/TPS-80 Ground/Air Task Oriented Radar, rely on rare earth magnets, and it has come to the committee's attention that there are

cases where these magnets are being supplied by foreign companies. The committee finds the Department's use of national security waivers to enable continued reliance on these foreign-origin magnets, to specifically include samarium-cobalt magnets, troubling, and it notes such concern elsewhere in this report. The committee is concerned that in relying on foreign companies for supply of these magnets, the Department may unknowingly impart knowledge of design parameters, performance requirements, and test procedures for parts or components in advanced U.S. military equipment. The committee is also concerned that the recent discovery of Chinese-origin rare earth magnets in the JSF supply chain occurred only as a result of compliance requirements related to the prohibition on foreign sourcing of other elements such as titanium, steel, and zirconium.

Therefore, the committee directs the Director of the Defense Contract Management Agency to conduct an examination of the sourcing of rare earth elements in Acquisition Category (ACAT) I programs not later than February 1, 2015. In doing so, the Director should determine whether an ACAT I program contains rare earth elements that are necessary to the functionality of that program. If so, the Director should determine the country of origin of the elements. If the Director has reason to believe that rare earth elements in an ACAT I program were manufactured by a foreign entity, then the Director should immediately inform the program manager in writing, and provide a report of the findings to the congressional defense committees, not later than March 1, 2015. The report may be provided in classified form.

#### Use of National Security Waiver to Specialty Metals Clause

The committee is aware of recent cases where the Secretary of Defense has waived the legal requirement to buy specialty metals from American sources, pursuant to the national security waiver clause in subsection (k) of section 2533b, title 10, United States Code. The committee believes that the national security waiver should be used only to provide flexibility to the Department of Defense when there is imminent threat of harm to U.S. service members or national security interests, not in lieu of the other exceptions provided in the clause. The committee is concerned that recent use of the waiver has not been aligned with this intent, therefore the committee directs the Secretary of Defense to report to the congressional defense committees, not later than December 1, 2014, on the Department's use of the national security waiver clause in section 2533b of title 10, United States Code. The report should include:

- (1) Documentation of all national security waivers issued by the Department since 2008;
- (2) The procedures used by the Department to determine whether a national security waiver should be issued;
- (3) The procedures used by the Department to determine whether a supply deficiency is best addressed through the national security waiver or through the availability exception;

(4) The procedures used by the Department to monitor contractor compliance;

(5) The procedures used by the Department to determine whether noncompliance by contractors and subcontractors is “knowing or willful” (10 U.S.C. 2533b(k)(3)); and

(6) The procedures used by the Department to determine whether further action by the Department is necessary to prevent the recurrence of the supply chain issue that led to noncompliance and the subsequent issuance of a national security waiver.

## TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

### ITEMS OF SPECIAL INTEREST

#### Comptroller General Review of Department of Defense Headquarters Reductions

The committee is aware that in July 2013, the Secretary of Defense directed a 20 percent reduction in the major headquarters budgets of the Department of Defense, and announced plans to implement a series of management efficiencies and overhead reductions within the Department. In December 2013, the Secretary then announced several organizational changes and personnel reductions within the Office of the Secretary of Defense (OSD), and stated that, “every dollar that we save by reducing the size of our headquarters and back-office operations is a dollar that can be invested in warfighting capabilities and readiness.” However, the committee notes that announcements on organizational changes and personnel reductions across the Department's other major headquarters organizations have not yet been made.

The committee has observed extensive growth in the Department's major headquarters over the past decade. In a 2013 review, the Comptroller General of the United States reported that the size of the headquarters staff of the geographic combatant commands, excluding U.S. Central Command (CENTCOM), had grown by 50 percent over the past decade. In an ongoing review for the committee, the Comptroller General has found even larger growth at CENTCOM, noting its support to military operations in the Republic of Iraq and the Islamic Republic of Afghanistan over the past decade, as well as the functional combatant commands, the service secretariats and service staffs, the Joint Staff, and the Office of the Secretary of Defense. The Comptroller General further observed a lack of discipline in setting and validating requirements for individual headquarters, and a lack of visibility into the total resources allocated across organizations for similar functions and missions. The growth in bureaucracy at the Department is also being examined by the Defense Business Board in the context of its review of best business practices in human capital management.

While the committee welcomes the Department's efforts to implement management efficiencies and overhead reductions, it is concerned that the Department may seek to implement such changes and across-the-board personnel reductions without the benefit of a comprehensive assessment of mission and functional requirements, critical capability and skillset requirements, and cost drivers. Elsewhere in this Act, the committee includes a provision that would direct the Secretary of Defense to develop a plan to combine combatant command back-office functions in order to achieve greater efficiencies.

The committee appreciates the Comptroller General's reviews and believes that further assessment of the data collected by the Comptroller General may better inform the Department, as it continues efforts to generate cost savings through organizational changes and personnel reductions, and the committee as it continues to oversee such efforts. Therefore, the committee directs the Comptroller General to perform an in-depth review in order to identify:

- (1) Any trends in personnel and other resources being devoted to selected functional areas within and across related organizations;
- (2) To what extent the Department of Defense and the military services have taken steps to eliminate or consolidate overlapping, fragmented, or duplicative functions;
- (3) Whether efforts to date constitute a systematic and comprehensive approach; and
- (4) Any additional steps the Department could take to realize additional savings.

The organizations that should be considered in this cross-cutting review should include, but not be limited to, the Office of the Secretary of Defense, the Joint Chiefs of Staff, the service secretariats and staff, the geographic and functional combatant commands and their service component commands, and the defense agencies and field activities. The committee directs the Comptroller General to submit one or more reports, as deemed appropriate by the Comptroller General and agreed to with the committee, by April 30, 2015, to the Committee on Armed Services of the House of Representatives.

#### Comptroller General Review of Operational Test and Evaluation Processes and Activities

The committee remains concerned over the regularity at which an increase in time and funding is required to develop and field new weapon systems. To help inform the committee's understanding of how operational test and evaluation processes and activities may unnecessarily increase schedule and cost of major defense acquisition programs, the committee directs the Comptroller General of the United States to review the operational test and evaluation processes and activities of the Department of Defense and to inform the congressional defense committees of the results of that review not later than March 15, 2015. The review should, at a minimum, examine:

(1) The processes the Director of Operational Test and Evaluation (DOT&E) uses to select programs for oversight and the number and types of programs covered since October 1, 2009;

(2) The nature and extent of oversight DOT&E conducted or is conducting on these programs;

(3) The extent to which the requirements of subsection 2339(b) of title 10, United States Code, are applied in such a manner that imposes additional operational requirements on programs overseen by DOT&E or necessitates testing of operational requirements not previously validated by the Joint Requirements Oversight Council or a military service;

(4) The benefits of DOT&E oversight on these programs, to include enhancements of program performance, reliability, and capability;

(5) Cost or schedule delays in the operational test phases of these programs and the resulting cost and schedule delays incurred by these programs as a result of oversight processes and activities of DOT&E; and

(6) The specific DOT&E criteria, for example, measures of effectiveness and analysis, and process to measure effectiveness, suitability, and survivability of programs.

## TITLE X—GENERAL PROVISIONS

### ITEMS OF SPECIAL INTEREST

#### COUNTER-DRUG ACTIVITIES

##### U.S. Southern Command Asset Resourcing

The committee continues to be discouraged by asset resourcing in U.S. Southern Command (SOUTHCOM). In particular, the committee is concerned that a shortfall in maritime, aerial, and intelligence, surveillance, and reconnaissance (ISR) assets in the region hampers SOUTHCOM's ability to combat the illicit networking of drugs, weapons, humans, and money, and affects security and stability along the southern border of the United States.

While the Office of National Drug Control Policy's whole-of-government goal is to remove 40 percent of narcotics transiting to the United States through SOUTHCOM's area of responsibility (AOR) by fiscal year 2015, the committee notes that this goal is unlikely to be met, in large part because resources allocated to the region to address this goal are continuing to diminish. In testimony before the committee in February 2014, the commander of SOUTHCOM expressed his concern about U.S. asset shortfalls in the region to meet the command's assigned missions derived from this whole-of-government goal, among others. Specifically, the commander testified that SOUTHCOM requires a 16.0 ship presence to support the command's assigned missions. In contrast, the commander estimates that, in fiscal year 2015, SOUTHCOM will maintain a sporadic 3.0 ship presence. Similarly, the

commander of SOUTHCOM, before the Senate Committee on Armed Services in March 2014, estimated that in fiscal year 2015, the command will satisfy only 5 percent of its ISR requirements associated with combating transnational organized crime.

The committee recognizes that the cost of combating illicit drug and other networks is exponentially lower, and the associated violence levels minimal, outside the United States as compared to inside the Nation. Therefore, in order to more effectively interdict narcotics and combat other illicit networks and transnational criminal organizations in the region, the Department of Defense must prioritize the detection and monitoring mission in SOUTHCOM.

The committee directs the Secretary of Defense, in coordination with the Chairman of the Joint Chiefs of Staff, to submit a report to the congressional defense committees by February 1, 2015, on the Department's updated strategy to combat illicit drug networks, other illicit networks, and transnational criminal organizations, in the SOUTHCOM AOR. The strategy should include an identification of requirements, assessment of capability gaps and shortfalls, assessment of assets and resources necessary to address the gaps and shortfalls, and plan for allocating those assets and resources. Lastly, the strategy should include an assessment of and cost estimate for alternative platforms, including maritime and aerial platforms, that could also satisfy the command's detection and monitoring requirements.

#### OTHER MATTERS

##### Inspector General's Report on Over-Classification of National Security Information

The committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than March 1, 2015, on the status and implementation of the recommendations found in the Department of Defense Office of the Inspector General's report, "DOD Evaluation of Over-Classification of National Security Information" (DODIG-2013-142). The Secretary's report should include specific actions taken to implement the recommendations contained in the report and timeframes for implementing the remaining recommendations.

##### Phased Modernization of Certain Navy Ships

In March 2014, the Navy proposed to reduce its operational force structure of Ticonderoga-class cruisers and amphibious dock landing ships (LSD). The Navy plans to take 14 ships out of their normal deployment rotations and place them in long-term phased modernization and maintenance to extend the expected service life of the ships. According to the Navy, this plan will allow it to retain the 11 cruisers and 3 amphibious ships through the 2030s and into the 2040s.

The committee is concerned about the Navy's plan to reduce its battle force structure by 14 ships, especially in light of shortfalls in the force structure necessary to meet the requirements of the National Military Strategy.

Additionally, the committee notes that while the Navy places Military Sealift Command ships in reduced operating status, or ROS, on a regular basis, surface combatant and amphibious ships are more complex and their crews need more training before they can be certified as being ready for deployment and major combat operations. Further, the Navy states it has not reactivated any surface combatant ships from long-term protective storage since the 1980s.

Therefore, the committee directs the Comptroller General of the United States to report to the congressional defense committees by March 1, 2015, on the extent to which the Navy has identified:

(1) The potential costs and cost savings associated with the Navy's phased modernization plan for the 11 cruisers and 3 LSDs;

(2) The operational benefits and risks associated with this long-term plan; and

(3) The costs, savings, benefits, and risks of any alternate plans that were considered before putting forth the Navy's current plan.

#### Report on National Commission on the Structure of the Air Force Recommendations

The National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) established the National Commission on the Structure of the Air Force to evaluate the Total Force force structure of the Active, Guard, and Reserve Components of the Department of the Air Force.

The committee is grateful for the time, effort, dedication, and expertise of all the commissioners and their staff that was applied to the development of the commission's report, despite the burdensome and arcane interpretation and application of the Federal Advisory Committee Act (Public Law 92-463) to the commission's deliberations. The committee thanks the commissioners and staff for their many years of distinguished service in key leadership positions of the national security apparatus.

The commission was charged with reviewing six distinct areas of the Air Force Total Force: (1) current and anticipated requirements of combatant commanders; (2) personnel and mission balance between all components of the Total Force; (3) capacity and capability of the Total Force for addressing Homeland Defense and Disaster Assistance requirements; (4) regular Air Force ability to provide capability and capacity to the Reserve Components; (5) operational tempo of Total Force components; and (6) the affordability, efficiency, effectiveness, capability, and readiness of the Total Force enterprise to meet national security requirements.

The commission derived 42 distinct recommendations for the President, Congress, and the Department of Defense to consider. The committee notes that during House-Senate conference deliberations on Public Law 112-239, it was acknowledged that the commission's report would not likely inform the President's budget submission for fiscal year 2015 because of Department of Defense budget process timelines, the date for submission of the commission's report, and late

enactment of Public Law 112-239, which established the commission. The conferees expected the report to be used to inform the Department's fiscal year 2016 budget submission to the Congress in calendar year 2015.

Air Force leadership testimony this year and recent discussions and briefings with Air Force officials indicate that Department of Defense officials are evaluating the commission's 42 recommendations to determine whether or not they could be viably institutionalized into the Air Force's Total Force enterprise. Therefore, the committee directs the Secretary of the Air Force, in consultation with the Chief of the National Guard Bureau, to submit a report to the congressional defense committees not later than February 2, 2015, that includes the following:

- (1) Assesses all 42 recommendations of the commission's report;
- (2) Establishes an official regular Air Force, Air Force Reserve, and National Guard Bureau position on each recommendation;
- (3) Articulates which of the 42 recommendations are incorporated into the President's fiscal year 2016 budget request and fiscal year 2016 Future Years Defense Program for the Department of Defense;
- (4) Describes the method, measures of effectiveness, and metrics established for evaluating each recommendation incorporated into the budget request;
- (5) Articulates the interim or final disposition of each recommendation, and associated rationale, that is not integrated into the fiscal year 2016 budget request;
- (6) Includes dissenting views or opinions of any Air Force Total Force component leadership associated with the evaluation and disposition of any recommendation of the commission's report; and
- (7) Any additional information that the Secretary of the Air Force or the Chief of the National Guard Bureau desire to include in the report.

#### Security Risks Related to Foreign Investment in the United States

The committee is concerned that gaps may exist within the current legislative and regulatory authorities for assessing the potential security impact of certain real property transactions involving the Federal Government and foreign-controlled entities within the United States. As a result of some recent transactions, entities controlled by foreign interests have acquired access to onshore and offshore properties within proximity of Department of Defense facilities, ranges, and sensitive operating areas.

The committee is concerned that such access and the proximities of associated properties could combine to negatively affect military readiness and national security. The committee notes that other government agencies are not required to coordinate with the Department of Defense to assess the potential effects of selling or leasing Federal property to foreign-controlled entities seeking to operate in the vicinity of military operating areas or installations. The committee also notes that the current processes that examine foreign investment in the United States do not cover all categories of transactions or projects having the potential to

adversely affect Department of Defense capabilities and technologies, to include the possible exposure of tactics, techniques, and procedures. Therefore, the committee directs the Secretary of Defense, in consultation with other relevant Federal departments and agencies as appropriate, to conduct an assessment of the current statutory and regulatory framework governing real property transactions involving the Federal Government and foreign-controlled entities within the United States as they relate to military readiness and national security. The review should address:

(1) The processes by which the Department of Defense and the military services assess national security risks posed by foreign investments in Federal properties or facilities within proximity of Department of Defense operating areas or installations;

(2) Actions that may be taken by the Department of Defense to mitigate such risks;

(3) The manner in which the Department of Defense coordinates efforts with other Federal agencies to monitor proposed real property transactions involving the Federal Government and foreign-controlled entities within the United States; and

(4) Procedures by which the Secretary of Defense could communicate concerns to other Federal departments and agencies regarding a proposed real property transaction with a foreign-controlled entity due to proximity to Department of Defense facilities, ranges, or operating areas.

The committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than January 5, 2015, on the findings of the review and on any recommendations that the Secretary may have for improving the current statutory and regulatory framework for monitoring real property transactions involving the Federal Government and foreign-controlled entities within the United States for possible national security implications. Within 90 days after the date of submission, the Comptroller General of the United States should conduct a sufficiency review of the report submitted by the Secretary and report the results of that review to the congressional defense committees.

## TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

### ITEMS OF SPECIAL INTEREST

#### Monitoring of Ongoing Construction Activities in Afghanistan

The committee is aware that there may be limitations in the ability of U.S. forces to access all parts of the Islamic Republic of Afghanistan to monitor ongoing Department of Defense construction activities after December 31, 2014. Therefore, the committee directs the Secretary of Defense to provide a briefing to the Committee on Armed Services of the House of Representatives, not later than December 15, 2014, on plans to monitor such activities after December 31, 2014.

## Report on Financial Management Capacity of Afghan Ministry of Defense and Ministry of Interior

In November 2013, the Special Inspector General for Afghanistan Reconstruction (SIGAR) issued a report titled, "Comprehensive Risk Assessments of MOD and MOI Financial Management Capacity Could Improve Oversight of Over \$4 Billion in Direct Assistance Funding" (SIGAR-14-12-SP). The report evaluated whether Department of Defense funds provided to the Ministry of Defense (MOD) and the Ministry of Interior (MOI) of the Islamic Republic of Afghanistan are properly managed and safeguarded to protect against fraud, waste, and abuse. The Department of Defense reported to SIGAR that, as of September 2013, it committed \$4.2 billion and disbursed nearly \$3.0 billion in direct assistance to the Afghan MOD and MOI for the sustainment of the Afghanistan National Security Forces (ANSF), including procurement of food, goods, and services; funding salaries; and funding minor construction.

The committee believes that an assessment of the financial management capacity of the Afghan MOD and MOI will improve the protection of U.S. direct assistance to Afghanistan to fund and equip the ANSF and ensure the assistance is used as intended. The committee also believes that an assessment of any associated risks for U.S. funds will assist the Department of Defense in developing mitigation measures to address any such risks.

Therefore, the committee directs the Inspector General of the Department of Defense to conduct a comprehensive assessment of the financial management capacity and risks within the Afghan MOD and the MOI. The Inspector General should also assess the capacity and risks within the Afghan Ministry of Finance, to the extent the Inspector General determines that such an assessment is required to protect Department funds and would not duplicate efforts conducted by other agencies of the U.S. Government. Such assessment should:

(1) Identify core financial management functions within the Afghan MOD and MOI, including: financial management and accounting capacity; financial accountability and control environment; procurement and asset management capacity; contracting mechanisms and processes; and management of personnel systems;

(2) Identify major risks and mitigation strategies deemed necessary for ensuring that the MOD and MOI are able to manage U.S. direct assistance; and

(3) Assess how a post-2014 United States and North Atlantic Treaty Organization residual military presence to train, advise, and assist the ANSF would help mitigate any risk in the financial management capacity of the Afghan MOD and MOI.

The committee further directs the Inspector General to provide a report on the results of the assessment to the Committees on Armed Services of the Senate and the House of Representatives by December 31, 2014.

The committee is cognizant of the security situation in Afghanistan and of other challenges that may affect the Inspector General's ability to carry out such an

assessment. The committee understands that the Inspector General would conduct the assessment in phases to accommodate these challenges. If the Inspector General cannot complete the assessment and deliver the required report by December 31, 2014, the Inspector General should notify the committees of the reasons the assessment cannot be completed by that date and include in such notification the date the Inspector General expects that the assessment will be completed and submitted.

### Report on Operational Contract Support in U.S. Africa Command

While much attention has been paid to the use of contractors by the Department of Defense to support the large-scale operations in the Republic of Iraq and the Islamic Republic of Afghanistan, the committee recognizes the Department uses contractors to support myriad efforts in other locations around the globe. Specifically, within U.S. Africa Command (AFRICOM), the Department relies heavily on contractors to provide logistical, linguistic, intelligence, and transportation support to ongoing training, advising, and other assistance missions. While the challenges and deficiencies regarding the planning, management, and oversight of contractors in Iraq and Afghanistan have been well documented, and the Department has taken several steps to address these challenges, the committee notes that the challenges associated with contractor support for other types of operations in other regions could be substantially different. In addition to broader concerns regarding planning, management, and oversight of contracts of this nature, the committee is concerned about the extent to which the Department may face operational contract support challenges in AFRICOM.

Therefore, the committee directs the Comptroller General of the United States to examine the processes AFRICOM uses to plan, manage, and oversee contractors that support its military operations conducted in Africa. Specifically, the review should include an assessment of the following:

- (1) The extent to which AFRICOM uses contractors to support its programs and operations and the appropriateness of how AFRICOM uses contractors to support such programs and operations;
- (2) The extent to which AFRICOM depends on the Department of State to provide operational contract support to its activities in Africa and the potential challenges associated with this support;
- (3) The organizational structure in place at AFRICOM and its subordinate commands to manage operational contract support, including planning for the use of contractors and oversight of contractors during operations, as well as the systems and processes for tracking contractors throughout operations;
- (4) The processes used to vet non-United States contractors and contractor employees; and
- (5) Any other issues the Comptroller General determines appropriate with respect to the Department of Defense's operational contract support in AFRICOM.

The committee directs the Comptroller General of the United States to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2015, on the above assessment, with a follow-on report delivered to those committees not later than April 15, 2015.

#### Report on U.S. Army Regionally Aligned Brigade in Africa

In 2013, U.S. Africa Command (AFRICOM) became the first geographic combatant command to receive a regionally aligned force (RAF). Under the regionally aligned force concept, the Army will align designated units to specific regions and deploy small groups of personnel from those units to conduct security force assistance activities, leaving the rest of the units at their home stations. These activities include exercises, training events, and other security cooperation and security force assistance activities. The RAF units are expected to maintain readiness for their core mission even as they support the geographic combatant commander's needs. The Army has designated one brigade to serve as the regionally aligned force for AFRICOM.

The committee is concerned about potential overlaps in roles and responsibilities, and notes that there are other Department of Defense security force assistance activities underway in Africa, including Africa Contingency Operations Training and Assistance efforts and the National Guard's State Partnership Program. Furthermore, the committee is concerned that these additional mission requirements and the dispersion of the RAF may impact the ability of the force to maintain readiness for its core mission. Elsewhere in this report, the committee expresses support for the Army's RAF concept but also states various concerns. In addition, elsewhere in this Act, the committee includes a provision that would require the Secretary of the Army to submit an assessment of the RAF to the congressional defense committees concurrent with the submission of the President's budget for fiscal year 2016.

As a complement to this assessment, the committee directs the Comptroller General of the United States to evaluate the employment of the RAF in Africa. The Comptroller General's evaluation should be informed by the required Army assessment and include the following:

(1) The extent to which AFRICOM has defined the intended roles, responsibilities, goals, objectives, and required capabilities for the use of the regionally aligned brigade to conduct security force assistance activities, to include evaluating the impact of conducted activities;

(2) The extent to which AFRICOM has identified and mitigated potential overlap between the requirements and capabilities of the regionally aligned brigade and other Department of Defense security force assistance activities within AFRICOM;

(3) The extent to which the regionally aligned brigade has been able to meet AFRICOM requirements to conduct security force assistance activities, to include

the training and equipping of brigade personnel and associated costs to meet mission requirements;

(4) What impact, if any, the regionally aligned brigade's security force assistance activities and requirements in AFRICOM have had on its ability to maintain readiness, to include adhering to training schedules; and

(5) Any other issues the Comptroller General determines appropriate with respect to the Army's regionally aligned brigade in Africa.

The committee directs the Comptroller General to provide a preliminary briefing to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2015, on the above evaluation, with a report to follow not later than April 15, 2015.

#### Report on U.S. Government Comprehensive Approach to Strengthen its Strategic Partnership with Djibouti

The committee believes that the strategic relationship between the U.S. Government and the Government of the Republic of Djibouti remains one of the most important strategic relationships that the United States has in the region. In written testimony submitted to the committee on March 5, 2014, the Commander, U.S. Africa Command (AFRICOM) stated that the Department of Defense's presence at Camp Lemonnier in Djibouti, "provides a critical platform for our activities, as well as those of Central Command, Special Operations Command, and Transportation Command." The committee further notes the importance of the Department's presence in Djibouti in the classified annex to this report.

The committee appreciates the Government of Djibouti's continued support of this relationship and therefore, elsewhere in this Act, the committee includes a provision that would provide an enhanced authority to the Secretary of Defense to acquire products and services produced in Djibouti in support of Department of Defense activities in AFRICOM.

However, the committee believes that a comprehensive, long-term, interagency approach is necessary to support the strategic relationship between the two countries, and to support ongoing Department of Defense efforts facilitated by that relationship. The committee is aware that the Department of State and the U.S. Agency for International Development are engaged in Djibouti, but believes that these efforts could be better coordinated within the interagency and should be robust enough to support such a comprehensive approach.

Therefore, the committee directs the Secretary of Defense, in coordination with the Secretary of State, to provide a report to the Committees on Armed Services of the Senate and the House of Representatives, as well as the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives, not later than February 6, 2015, on the specific steps the U.S. Government is taking to strengthen its strategic relationship with Djibouti, including:

- (1) A summary of the strategic goals for the relationship between the United States and the Government of Djibouti;
- (2) An assessment of the current state of the relationship between the United States and the Government of Djibouti; and
- (3) A detailed description of the steps being taken, and additional steps that could be taken, to support a long-term, strategic relationship between the United States and the Government of Djibouti.

#### Upgrading Beryllium within the National Defense Stockpile

The committee notes that the existing National Defense Stockpile (NDS) for beryllium, a strategic and critical defense material, is presently not in a form which is usable within the defense supply chain. Viable sources of beryllium are only found in the United States and the Russian Federation. The committee continues to believe that military readiness requires continued quick access to beryllium. The committee recognizes the concerted effort on the part of the Department of Defense and the Defense Logistics Agency (DLA), which administers the NDS, to upgrade the beryllium stockpile. In its latest Annual Materials Plan, the DLA stated its plan to upgrade more than 17 short tons of beryllium material. The committee urges the DLA to upgrade this material quickly, thereby ensuring that the beryllium held in the NDS is capable of quick insertion into the defense supply chain, potentially mitigating supply chain risk.

In addition, the committee directs the Administrator of the National Defense Stockpile to brief the House Committee on Armed Services not later than September 1, 2014, on the progress of and future plans for the upgrade program for beryllium.

## DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

### TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

#### ITEMS OF SPECIAL INTEREST

#### Report on Circumvention of Military Construction Laws

The committee is aware of certain construction projects that were awarded without a specific authorization from Congress and in apparent contravention to section 2802 of title 10, United States Code. The committee is concerned by the contracting officer's and fiscal attorney's assessment to not seek a specific military

construction authorization for these projects prior to award. The committee is further concerned that similar construction projects may have been undertaken within the past 5 years without a specific authorization by Congress. As such, the committee directs the Secretary of Defense to submit a report to the congressional defense committees by March 1, 2015, that assesses the entirety of all construction projects carried out in the last 5 years by the Secretary concerned without a specific authorization by Congress. This assessment should only review construction projects that exceed the minor military construction thresholds established by section 2805 of title 10, United States Code.
